How to Write Your Physician Assistant Personal Statement

Dec 01 2019 You've finally finished your personal statement and it's perfect! There's just one thing to consider before hitting the "send" button - will it meet the admission team's expectations?

How will you know? CASPA guidelines are vague - "Write a brief statement expressing your motivation or desire to become a physician assistant." School websites aren't generally more helpful. Do they want to hear that you've dreamed of becoming a PA since you were five and loved your toy stethoscope? Are they interested in your volunteer work at a homeless shelter? Will it help that you've been a science nerd since 9th grade Biology? How should you tell your story? Should it read like a textbook, a novel or something in between? The fact is there hasn't been much guidance. Until now. Admissions directors and faculty from PA programs across the country have shared their thoughts on personal statements - what they hope to see, what they wish they'd never see, and tips to make an essay shine. When compiling this book, we realized that access to insider information is just the first step to writing a winning personal statement. That's why we teach you everything you need to know about essay writing, from form to finesse, with step-by-step tips and examples. This is your all-in-one guide to writing the ideal personal statement for Physician Assistant programs anywhere in the country.

MEDEX Northwest Physician Assistant Program, The Aug 21 2021 The MEDEX Northwest Physician Assistant Program was created at the University of Washington in 1968 as one of the nation's first physician assistant (PA) programs. A joint project of the Washington State Medical Association and the University of Washington School of Medicine, MEDEX was designed to meet the needs of overworked physicians in rural communities. As envisioned by MEDEX founder Dr. Richard A. Smith, "Physician Assistants were created by physicians, for physicians." Initially, all MEDEX students were former military corpsmen returning from Vietnam. Based on their extensive clinical experience, they were well accepted by doctors and their patients. Dr. Richard Smith was a former Peace Corps physician and leader of the federal project to desegregate the US hospital "system" as a requirement for Medicare reimbursement. Dr. Smith's founding principles for MEDEX included a collaborative model for community and practitioner involvement--the framework for the MEDEX Program throughout its 45-year history.

The Preceptor's Handbook for Supervising Physician Assistants Jun 26 2019 The Preceptor's Handbook for Supervising Physician Assistants is a helpful guide for clinical preceptors of physician assistant (PA) students during their educational program and for physicians who supervise PAs in their practice. This work encompasses the experience and passion of four dedicated PA educators with combined experience of over

100 years. This indispensable resource addresses current practice as well as future projections and provides guidance for new styles of supervision in evolving health care systems including distance supervision, supervision in teams, and patterns of supervision in home care and geriatrics. Covering a wide variety of topics including supervision in the team environment as well as in individual practice, this handbook will provide the physician and physician assistant with the information and skills needed to be an excellent preceptor for students and a supervising clinician for graduate PAs. Features • Case Studies • Job Descriptions • Performance Agreements • Evaluation Tools • Professional Improvement Plans "The uniqueness of the physician-PA team paves the way for effective physician assistant practice. The Preceptors Handbook: A Guide to Supervising Physician Assistants presents a comprehensive model to help physicians reap the benefits that PAs bring to their practice, their patients, and the health care team. This clear and accessible resource provides step-by-step guidelines for building relationships with PAs, including tips on how to hire and work effectively with a PA, how to give constructive feedback, and how to apply coaching strategies. The authors, all leaders in PA education and practice, provide the essential information for building and sustaining a successful physician-PA team." ~ Janet J. Lathrop, MBA President, National Commission on Certification of Physician Assistants (NCCPA)

All in Nov 04 2022 In reading ALL IN: The Making of a PHYSICIAN ASSISTANT, one begins to understand that the PA has chosen a vocation in which work will permeate all the hours of a day. Being a PA is an extension of the Hippocratic Oath to treat the sick to the best of one's ability, preserve patient's privacy, teach the secrets of medicine to the next generation. A Physician Assistant's greatest value is being both available and approachable in providing knowledge and skills while continuing to learn from patients, their peers, and the physicians they are

working with. This author shares a "slice of this life" during her PA employment of 38 years. The PA profession was established in 1967 with the return of medics from the Vietnam war and now more than 150,000 PA's practice in outpatient offices, hospitals, urgent care centers, in surgery, and in the emergency rooms. The deep roots of the PA profession are firm with the earnest tireless energy of PA's over 54 years. Becoming a PA is often pursued after one observes and works with PA's who consistently address unique patient needs in these clinics, hospitals as well as in community settings. Today, Physician Assistants rank #1 in 100 Best jobs of 2021 according to the U.S. News and World Report with the demand for PA's increasing more than 300% from the prior 10 year period. According to the most recent Harris Poll, 93% reported extremely high satisfaction with PA's as trusted healthcare providers, and 91% felt that PA's have improved the quality of healthcare. Truly the impact PA's have had on patients is exemplified by the bonds patients have with these medical providers. It truly is a privilege for a Physician Assistant to provide this care.

Patients at Risk Mar 28 2022 Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be. While advocates for these professions insist that research shows that they can provide

the same care as physicians, patients do not know the whole truth: that there are no credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as *An American Sickness*, this book provides a roadmap for patients to protect themselves from medical harm. WORDS OF PRAISE and REVIEWS Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media outlets are missing and one that puts you and your family's health at real risk. --John Irvine, *Deductible Media* Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and solutions to ensure quality care. --Marilyn M. Singleton, MD, JD A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of *Profits Over Patients*, echoed by hospitals and health insurance companies. --John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA
