The Globalization of Health Care Oct 01 2020 The Globalization of Health Care is the first book to offer a comprehensive legal and ethical analysis of the most interesting and broadest reaching development in health care of the last twenty years: its globalization. It ties together the manifestation of this globalization in four related subject areas - medical tourism, medical migration (the physician "brain drain"), telemedicine, and pharmaceutical research and development, and integrates them in a philosophical discussion of issues of justice and equity relating to the globalization of health care. The time for such an examination is right. Medical tourism and telemedicine are growing multi-billion-dollar industries affecting large numbers of patients. The U.S. heavily depends on foreign-trained doctors to staff its health care system, and nearly forty percent of clinical trials are now run in the developing world, with indications of as much of a 10-fold increase in the past 20 years. NGOs across the world are agitating for increased access to necessary pharmaceuticals in the developing world, claiming that better access to medicine would save millions from early death at a relatively low cost. Coming on the heels of the most expansive reform to U.S. health care in fifty years, this book plots the ways in which this globalization will develop as the reform is implemented.

The Measure of Madness: Aug 11 2021 Enter the “fascinating” and frightening world of modern forensic psychology as experienced by one of the most respected practitioners in the field today (Robert K. Tanenbaum, New York Times–bestselling author). At the heart of countless crimes lie the mysteries of the human mind. In this eye-opening book, Dr. Cheryl Paradis draws back the curtain on the fascinating world of forensic psychology, and revisits the most notorious and puzzling cases she has handled in her multifaceted career. Her riveting, sometimes shocking stories reveal the crucial and often surprising role forensic psychology plays in the pursuit of justice—in which the accused may truly believe their own bizarre lies, creating a world that pushes them into committing horrific, violent crimes. Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect’s madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual’s fate—or if justice will be truly served. The criminal thought process has never been so intimately revealed—or so darkly compelling—as in this “excellent and entertaining” journey into the darkest corners of the human mind (Booklist).

Protecting and Promoting the Health of NFL Players Jan 24 2020 This comprehensive report, published as part of the Football Players Health Study at Harvard University, more than two years in the making and 493 pages long, is an unprecedented step towards improving player health, concluding with several important recommendations. To date, there has been no analysis of the universe of stakeholders that may influence the health of NFL players, nor any systematic analysis of their existing or appropriate legal and/or ethical obligations. While clinical health care interventions are essential, player health also depends on understanding the wider context in which players work. The report examines 20 diverse stakeholders: NFL players, the NFL, the NFLPA, NFL club medical staff, second opinion, neutral and personal doctors, NFL clubs and personnel, NFL coaches, contract advisors, financial advisors, equipment managers and manufacturers, players' family members, officials, the media, NFL business partners, and fans. In total, the report makes 76 recommendations. Highlights of the key proposals are summarized below: * Conflicts of interest: The current arrangement under which a team's medical staff, including doctors and athletic trainers, have responsibility both to the players and to the club presents an inherent structural conflict of interest. A division of responsibilities between two distinct groups of medical professionals is needed to minimize such conflict and ensure that players receive medical care that is as unbiased and uninfluenced by competing interests as possible. Care and treatment should be provided by one set of medical professionals, called the "Players' Medical Staff," appointed by a joint committee with representation from both the NFL and NFLPA. The evaluation of players for business purposes should be conducted by a separate set of medical personnel, known as the "Club Evaluation Doctors." * Player health and adversarial collective bargaining: The NFL and NFLPA should refrain from making improvements to player health policies a

"bargaining chip" in labor negotiations, to the extent that this is not already the case. Players should never be asked to trade their healthcare for other benefits in the collective bargaining process. * Ethical guidelines: Various stakeholders - including club doctors, athletic trainers, coaches, contract advisors, and financial advisors - should adopt, improve and enforce Codes of Ethics specific to the environment of the NFL.* Ongoing research into the health effects of the game: The NFL and NFLPA should continue to initiate and support efforts to scientifically and reliably identify the health risks and benefits of playing professional football. * Access to data: The NFL and, to the extent possible the NFLPA, should make aggregate, de-identified injury data publicly available for independent reanalysis. They should also continue to improve their robust collection of data and offer it to qualified professionals for analysis. * Meaningful penalties: The collective bargaining agreement (CBA) should be amended to impose meaningful fines for any club or person found to have violated Sections 1 through 6 of Article 39 of the 2011 CBA (players' rights to medical care and treatment). * Investing in players' health and care: The NFLPA should consider investing greater resources to investigate and enforce player health issues and enforce player rights, including Article 39 of the CBA. Published alongside the report are a list of the Top 10 Recommendations in the report (also included in the Executive Summary at the beginning of the report), and A Patient Bill of Rights for NFL Players - including current and proposed rights under the CBA, NFL policy, law and/or codes of ethics (which can be found on the Football Players Health Study at Harvard University website).

Vietnam 2035 Dec 03 2020 Thirty years of *Đổi Mới* (economic renovation) reforms have catapulted Vietnam from the ranks of the world's poorest countries to one of its great development success stories. Critical ingredients have been visionary leaders, a sense of shared societal purpose, and a focus on the future. Starting in the late 1980s, these elements were successfully fused with the embrace of markets and the global economy. Economic growth since then has been rapid, stable, and inclusive, translating into strong welfare gains for the vast majority of the population. But three decades of success from reforms raises expectations for the future, as aptly captured in the Vietnamese

constitution, which sets the goal of “a prosperous people and a strong, democratic, equitable, and civilized country.†? There is a firm aspiration that by 2035, Vietnam will be a modern and industrialized nation moving toward becoming a prosperous, creative, equitable, and democratic society. The Vietnam 2035 report, a joint undertaking of the Government of Vietnam and the World Bank Group, seeks to better comprehend the challenges and opportunities that lie ahead. It shows that the country’s aspirations and the supporting policy and institutional agenda stand on three pillars: balancing economic prosperity with environmental sustainability; promoting equity and social inclusion to develop a harmonious middle- class society; and enhancing the capacity and accountability of the state to establish a rule of law state and a democratic society. Vietnam 2035 further argues that the rapid growth needed to achieve the bold aspirations will be sustained only if it stands on faster productivity growth and reflects the costs of environmental degradation. Productivity growth, in turn, will benefit from measures to enhance the competitiveness of domestic enterprises, scale up the benefits of urban agglomeration, and build national technological and innovative capacity. Maintaining the record on equity and social inclusion will require lifting marginalized groups and delivering services to an aging and urbanizing middle-class society. And to fulfill the country’s aspirations, the institutions of governance will need to become modern, transparent, and fully rooted in the rule of law.
