Bush flew a TBF off the carrier USS San Jacinto in 1943-44. Originally printed by Grumman, G.M. and the U.S. Navy late in the war, this TBM-3 Flight Operating Handbook taught pilots everything they needed to know before entering the cockpit. *Grumman F4F (FM-2) Wildcat Pilot's Flight Operating Instructions* Sep 10 2020 The Grumman F4F Wildcat was the primary Marine Corps and U.S. Navy fighter aircraft during the opening year of WWII. Although the Japanese Zero outperformed it, Wildcat pilots more than held their own during the crucial battles at Coral Sea and Midway. Almost 8,000 Wildcats were built during the war, many of them by General Motors. The G.M. versions, designated FM-1 and later the improved FM-2, entered service after the faster Corsairs and Hellcats were deployed. As a result most FMs flew from escort carriers, most notably during the Battle off Samar where Wildcats helped turn back the Japanese fleet. Originally printed by Grumman and the U.S. Navy, this FM-2 flight operating handbook taught pilots everything they needed to know before entering the cockpit. Once classified "Restricted," the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been slightly reformatted. Care has been taken to preserve the integrity of the text.

**Fairchild Republic A-10 Thunderbolt II** Apr 17 2021 Dubbed 'Warthog' - or just 'Hog' - by those who fly and maintain it, the Fairchild Republic A-10 Thunderbolt II is the world's

undisputed close air support attack jet. As tough as it is ugly, it has built a fearsome reputation as a tank buster and infantry killer in conflicts around the globe, and its GAU-8 Avenger 30mm cannon strikes fear into the hearts of all unlucky enough to be on the wrong side of it. The A-10 was clutched from the jaws of retirement by the 1991 Gulf War. At the time of the conflict, the United States Air Force was making plans to shed its A-10 fleet, citing obsolescence and redundancy. As the ensuing conflict showed, nothing could have been further from the truth, and no other airframe could have provided the US and Coalition commanders with the sort of forward air control, close air support, combat search and rescue, and tank busting capabilities that the Hog did. Since then the A-10 has delivered capabilities to battlefield commanders in the Balkans (1990s), Afghanistan (2001 onwards) and the second Gulf War (2003 onwards), and Libya (2011). A-10s have flown around 11 per cent of Operation Inherent Resolve sorties (striking IS targets in Iraq) since combat operations began in August 2014.
