Yearbook of the International Law Commission 2013, Vol. II, Part 1 Apr 04 2020 The International Law Commission was established in 1947 with a view to carrying out the responsibility of the General Assembly, under article 13(1)(a) of the Charter of the United Nations, to “initiate studies and make recommendations for the purpose of ... encouraging the progressive development of international law and its codification.” Since its first session in 1949, the Commission has considered a wide-range of topics of international law and made a number of proposals for its codification and progressive development, some of which have served as the basis for the subsequent adoption of major multilateral treaties. The Yearbook of the International Law Commission contains the official records of the Commission and is an indispensable tool for the preservation of the legislative history of the documents emanating from the Commission, as well as for the teaching, study, dissemination and wider appreciation of the efforts undertaken by the Commission in the progressive development of international law and its codification. Volume II (Part One) reproduces the edited versions of the official documents considered by the Commission at the respective annual session.

The Future of the International Legal Order, Volume 1 May 30 2022 This is the first volume in a large-scale collaborative research project intended to focus the attention of international lawyers and social scientists on the near future of the international legal order. Sponsored by Princeton University with support from the Ford Foundation, the project seeks to stimulate research and provide an intellectual focus for the elucidation of the constructive role law can play in maintaining peace and improving welfare and dignity in the world. The contributors have been urged to engage in their respective areas of expertise in non-utopian forecasting that will enable law to contribute more creatively, by anticipating the range of feasible responses, to the solution of emerging problems in the international environment. Originally published in 1969. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

A New Generation in International Strategic Management May 06 2020 This book comprises eighteen cutting edge chapters by emerging scholars in international strategy, offering a variety of fresh perspectives on critical issues that the field will face in the near future. These young scholars have unique and innovative thoughts about international strategy, which are well ahead of the mainstream of international business academics. Various topics are addressed, including the rise of outsourcing and the global spread of research and development activities; structural innovations by multinational firms, with particular attention to organizing for the efficient transfer of knowledge resources within networks of alliances; and new ways of considering the effects of location, focusing on the relative importance of regional clusters and countries and the impact of geographical and cultural

distance on international strategies. Stephen Tallman has geared the book to an academic audience, specifically faculty and graduate students in international business, international management, and global strategy. Sophisticated international business practitioners will also find it an interesting read.
