Consequently, college students learn nothing about the great Austrian economists (Mises, Hayek, Schumpeter). Professor Mark Skousen's Economic Logic aims to change that. Based on his popular course taught at Columbia University, Skousen starts his "micro" section with Carl Menger's "theory of the good" and the profit-and-loss income statement to explain the dynamics of the market process, entrepreneurship, and the advantages of saving.

**Beyond Budgeting** Aug 07 2020 In their groundbreaking book, authors Jeremy Hope and Robin Fraser show how organizations can break free from the annual budget trap once and for all. Beyond Budgeting is not a new financial-planning process - it is an alternative, coherent management model that enables companies to manage performance through processes specifically tailored to today's volatile marketplace. Hope and Fraser spent five years studying a wide range of international companies - from a global corporation to a small charity, from a bank to a ball-

bearings manufacturer - that have already abandoned traditional budgeting to varying degrees. From these pioneering experiences, the authors have distilled a set of guiding principles that will take any company beyond budgeting to a whole new level of competitiveness. Based on the decision-making needs of front-line managers, Beyond Budgeting enables readers to take advantage of two major opportunities: 1) a set of adaptive management processes that replace centrally controlled, predetermined goals with self-regulating, relative competitive benchmarks, and 2) the transfer of power and decision-

making authority from the center of the organization to the front line.
