come up with an

list of near parabolic comets
wikipedia Nov 02 2022 web
the following is a list of comets
with a very high eccentricity
generally 0.99 or higher and a
period of over 1 000 years that
do not quite have a high
enough velocity to escape the
solar system often these
comets due to their extreme
semimajor axes and
eccentricity will have small
orbital interactions with
planets and minor planets most
often ending up with the
