Unposed Jun 19 2019 Follow in the footsteps of Leica Camera Ambassador Craig Semetko's 10 year trek across the globe to capture the spontaneity, humor, and juxtaposition of the human experience. In the book's forward, iconic photographer Elliott Erwin writes, "Good photographs are tough enough to shoot. Really funny ones are even harder. Good and funny photographs observed in nature not arranged or manipulated but simply observed in real time with amazing consistency, constitute a minor miracle now presented in Mr. Semetko's book...In my book, he is the essential photographer. That is, the one who sees what others could not have seen." Inspired by Cartier-Bresson, Robert Frank, and Elliott Erwitt, Craig Semetko is a collector of the spontaneous moment. With an uncanny knack for using Leica Cameras to capture the beautiful and unexpected that surrounds us all, Semetko offers a striking collection of imagery shot during 10 years of traveling around the world, from Edinburgh to Amsterdam, France to Los Angeles, Hanoi to Bangkok, and beyond. This visual celebration records the first decade of the twenty-first century across all walks of life. Semetko documents the muted beauty of regular people simply living their lives, and captures the humor found in the offbeat and eccentric contrasts all around us. Unposed is a memorable exploration of an era shot by a skilled photographer, dubbed by Esquire magazine as "a noble torchbearer" of the Leica Camera legacy.

*The Girl with the Leica Sep 22 2019 The life of a female war photographer killed in action is told by three of her friends in this biographical novel by the author of Bloody Cow. Gerda Taro was a German-Jewish war photographer, anti-fascist activist, artist, and innovator who, together with her partner, the Hungarian Endre Friedmann, was one half of the alias Robert Capa, widely considered to be the twentieth century's greatest war and political photographer. She was killed while documenting the Spanish Civil War and tragically became the first female photojournalist to be killed on a battlefield. August 1, 1937, Paris. Taro's twenty-seventh birthday, and her funeral. Friedmann leads the procession. He is devastated, but there are others, equally bereft, with him: Ruth Cerf, Taro's old friend from Leipzig with whom she fled to Paris; Willy Chardack, ex-lover; Georg Kuritzkes, another lover and a key figure in the International Brigades. They have all known a different Gerda, and one who is at times radically at odds with the heroic anti-fascist figure being mourned by the multitudes . . . Another character in the novel is the era itself, the 1930s, with economic depression, the rise of Nazism, hostility towards refugees in France, the century's ideological warfare, the cultural ferment, and the ascendancy of photography as the age's quintessential art form. Winner of the Strega Prize, *The Girl with the**

Leica M Compendium Jan 19 2022 The Leica M system has been with us since 1954. In this Leica M Compendium Jonathan Eastland describes the whole Leica M system from his experience as a professional photographer. He explains how to use, enjoy and get the best out of the cameras and lenses, regardless of age. The latest lenses can be used on the earliest cameras, and vice-versa, and the Visoflex, although no longer made, is now much easier to use with the M6 and its TTL metering. Advice on planning and shooting a story with the Leica and extensive tables of technical data complete this ideal companion for the practical Leica M photographer, as well as for the Leica collector and enthusiast.

The Leica M Photographer Jun 24 2022 What it is and what it isn't. This not a camera manual for the Leica M, nor is it a book that will teach you photography. Nevertheless, in Bertram Solcher's book you will learn a whole lot about your camera and how to use it, and about the art and craft of photography. This book contains a collection of illustrated essays that are meant to reveal the secrets of working with a rangefinder camera. To be more precise, with the best camera ever made. The book's ultimate goal is to ignite your passion for the kind of spontaneous, minimalist, and creative photography we admire in the works of Henri Cartier-Bresson, Joel Meyerowitz, and other great Leica photographers. All Leica M model cameras, both analog and digital, use rangefinder technology. Because of its design, working with a Leica M requires a more methodical style of photography where the photographer must slow down and exercise attention and purpose. Using these cameras is both challenging and rewarding. With a Leica M, you can mingle discretely within your environment

to capture candid, exciting, insightful images. Bertram Solcher, a professional Leica M photographer for over 35 years, demonstrates how to use this unique camera in a practical and effective way. Solcher's enthusiasm, substantial experience, and technical expertise will help you learn the skills necessary for creating masterful photographs with any Leica M camera.

Oskar Barnack - from the Idea to the Leica Apr 10 2021 It is approximately one hundred years ago that Oskar Barnack designed a camera for 35 mm motion picture film without a forerunner or any camera with similar specifications. The camera was to fit in a coat pocket and should always be ready to take pictures. Those were Oskar Barnack's self-imposed objectives. On 31 December 1839, the *„Münchner Politische Zeitung“* (Munich political newspaper) reported about a recent simplification of the Daguerrian method by Professor Steinheil, who had developed a camera for 4 x 4 cm negatives and who demanded that camera and pictures should be even significantly smaller in order for photography to achieve a greater popularity. Oskar Barnack did not know about this report, but it was Barnack who satisfied this demand 75 years later. The Leica was ridiculed in 1925, but in 1932 one hundred thousand cameras had been distributed all over the world. The Leica made it possible for the photographer to experience a new spirit in photography, a photography of the actual events. Contrived scenes were no longer necessary. But who was Oskar Barnack? What led him to the idea to design a camera around 35 mm motion picture film, fit in the coat pocket, and produced only a postage stamp sized negative? (Experts of the time said that could not be possible). However, the renowned manufacturer of microscopes, Ernst Leitz, of Wetzlar, Germany, which had never produced a camera, decided to manufacture this camera. Why? In Germany, at this time was the world's largest and most innovative camera industry. However, life was difficult because of ruinous competition between large camera manufactures. Still, the Leica could establish itself in a masterful way. How Oskar Barnack arrived at his idea and how he accomplished it is described in this book.

Dr. Ernst Leitz II and the Leica Train to Freedom Dec 18 2021 As a successful businessman, Ernst Leitz helped

hundreds of Jews escape death by creating an escape path out of Nazi Germany. His business manufactured cameras and photography equipment under the Leica brand. He sent Jewish employees abroad to safer places. Besides the employees themselves, Leitz helped their families and some of his Jewish neighbors and business associates flee by moving overseas. Jewish employees received training and permits that allowed them to travel abroad as sales agents for Leica products. Leitz organized and paid for their transit England, USA, Brazil, and Hong Kong. He gave them a Leica camera, which could easily be sold. Leitz paid their expenses until they could find employment in their new home. Many found work in the photo industry. Leitz did not speak of this but his son, Gunther, tried to write an article about the refugees. Leitz did not want to share his story. Perhaps he felt it would be boasting. He believed he had done what any decent person would do in his position. Gunther later said, "No one can ever know what other Germans had done for the persecuted within the limits of their ability to act." Like Oskar Schindler, Leitz was a member of the Nazi party. Many prominent people joined the party not because they agreed with Nazi policies, but because doing so allowed them to be left alone. They could continue running their businesses "under the radar" of Nazi scrutiny. Also, the Nazis' dependence on the military optics produced by Leica, made his company valuable to them. Leitz's heroism came to light many years later, when Rabbi Frank Dabba Smith of London, then still a student, saw Leitz refugees mentioned in a photography magazine. One of these refugees was Kurt Rosenberg, a camera mechanic. Leitz helped him get a visa to America, paid for his journey to New York in 1938, and got him a job at the Leica showroom on Fifth Avenue. Ernst Leitz's aid to his Jewish associates came from the heart. Also, from his determination to do what he believed was right. Gunther Leitz said, "He felt responsible for his workers, their families, for our neighbors in Wetzlar." Ernst Leitz put those feelings into action, and hundreds, perhaps even thousands, of people are alive today because of him."

Leica M Typ 240: A Guide for Beginners Dec 06 2020 Leica is a German-based Optimal Image company that started off as a producer of microscopes in 1849. It began to develop cameras in 1913, and then released the first of their signature camera series, the Leica, in 1925. The Girl with the Leica Nov 17 2021 1st August 1937. A parade of red flags marches through Paris. It is the funeral procession for Gerda Taro, the first female photographer to be killed on a battlefield. Robert Capa, who leads the procession, is devastated. They have been happy together: he taught her how to use the Leica before they left together to fight in the Spanish Civil War. Other figures from Gerda's past are in the crowd: Ruth Cerf, her friend from Leipzig, who shared the hardships of their first years in Paris after fleeing from Germany; Willy Chardack, who resigned himself to the role of loyal companion after Gerda snubbed him for Georg Kuritzkes, a fighter in the International Brigades. For all of them, Gerda will remain a stronger and more vivid presence than her image of anti-fascist heroine. It is her who binds together a narrative spanning distant times and places, bringing back to life the snapshots of these young people and the challenges they faced in the 1930s, from economic depression to the rise of nazism, to the hostility towards refugees in France. But for those who loved her, those young years would remain a time when, as long as Gerda was alive, everything seemed possible.

My Life with the Leica Feb 08 2021 Personalities around the Leica such as Ernst Leitz II, Oskar Barnack, Henri Dumur, Paul Wolff, Heinrich Stockler and Julius Behnke come to life again through Walther Benser's tales and recollections presented to us in a new light. The Leica lecture tours, started by Anton Baumann, soon became Benser's specialty with which he achieved world-wide recognition. He took his shows not only around Germany but also into neighboring countries even after the war had begun. As a result of his photographic activity he eventually became a war reporter. Then came the battle for survival, both during and after the war - and the Leica always played an important and often decisive role. Finally he resumed his lecture tours, earning great success across the continents, both for his own pictures and for the Leica. He then started his own business, which finally grew into a large color-picture agency. These are the stages in Walter Benser's life with the Leica, periods he lived through and helped to mold with every camera model, from the Leica I to the M6.

The Leica M Photographer Feb 20 2022 What it is and what it isn't. This not a camera manual for the Leica M, nor is it a book that will teach you photography. Nevertheless, in Bertram Solcher's book you will learn a whole lot about your camera and how to use it, and about the art and craft of photography. This book contains a collection of illustrated essays that are meant to reveal the secrets of working with a rangefinder camera. To be more precise, with the best camera ever made. The book's ultimate goal is to ignite your passion for the kind of spontaneous, minimalist, and creative photography we admire in the works of Henri Cartier-Bresson, Joel Meyerowitz, and other great Leica photographers. All Leica M model cameras, both analog and digital, use rangefinder technology. Because of its design, working with a Leica M requires a more methodical style of photography where the photographer must slow down and exercise attention and purpose. Using these cameras is both challenging and rewarding. With a Leica M, you can mingle discretely within your environment to capture candid, exciting, insightful images. Bertram Solcher, a professional Leica M photographer for over 35 years, demonstrates how to use this unique camera in a practical and effective way. Solcher's enthusiasm, substantial experience, and technical expertise will help you learn the skills necessary for creating masterful photographs with any Leica M camera.
