Under the Dragon Flag Oct 04 2022 The following narrative is a record of my experiences during the late memorable war between China and Japan. Without going into any detailed account of my earlier life, some few facts concerning myself are probably necessary for the better understanding of the circumstances which led up to the events here presented. It will be obvious that I can make no claim to literary skill; I have simply written down my exact and unadorned remembrance of incidents which I witnessed and took part in. Now it is all over I wonder more and more at the slightness of the hazard which suddenly placed me at such a period in so strange an experience.

China's Selective Identities Aug 29 2019 This book discusses the role of selective identities in shaping China's position in regional and global affairs. It does so by using the concept of the political transition of power, and argues that by taking on different types of identities—of state, ideology and culture—the Chinese government has adjusted China's identity to different kinds of audiences. By adopting different kinds of "self", China has secured its relatively peaceful transition within the existing system and, in the meantime, strengthened its capacity to place its principles within that system. To its immediate neighbors, China presents itself as a state that needs clearcut borders. In relation to the developing world (Global South), the PRC narrates "self" as an ideology with the banner of materialism, equality and justice. To its third "audience", the developed world (mainly Europe), China presents itself as a peaceful, innocent cultural construct based primarily on Confucius' passive approach. By bringing these three identities into "one Chinese body" (一个中国, sanwei yiti), China's policymakers skillfully maneuver and build the country's position in the arena of global affairs.

He was especially good at core training. He was always searching for new types of exercises in order to maximise the strength of his abdominal muscles. There are many advanced exercises linking to his name - and all are included here in this book for the first time ever. Maybe, the most famous one is the Dragon flag. The Earliest China Apr 17 2021 "The Earliest China" is the first archaeological book in China to translate in the dominant language of the world on the origin of Chinese ancient civilization in the Central Plains and the study of Xia dynastic culture. It shows readers all over the world the outstanding achievements in the study of the formation of early state in China and is the first English translation monograph on the birth history of the first dynasty of Hua-Xia nation from the perspective of archaeology. With the specific archaeological data on the basis of excavations and investigation conducted in recent years, this book focuses on the interpretation of the rise and development of the ancient civilization having initially appeared in the Central Plain of China and even in the Eastern Asia. The book contents include abundant manifestations of the first flourishing civilization especially at the Erlitou site along the Yi and Luo Rivers, characteristic of ultra-large capital city, palace buildings, elaborate bronze vessels, and stratified social organization. With the combination of previously literature, the original author attempts to further explain how the earliest China, a royal-powered, and large-scaled state, emerged four thousand years ago. In this book, the analysis on a comprehensive landscape of the ancient civilization prior to the Shang Dynasty leads the point of views, distinctively from the traditional historical perspectives. With a global perspective, he further compares with other significant civilizations in the world and also points out cultural communications between the early China and other external cultures in the Bronze Age. Therefore, this book, the Earliest China of English translated version is

Under the Dragon Flag Aug 02 2022 High Adventure on the China Seas For readers who enjoy tales of naval adventure in non-fiction or fiction this book will not disappoint. The British author managed to squander his substantial inheritance in 4 years and turned to life as a merchant seamen in the latter part of 19th century. Eventually he found himself aboard an American screw steamer, captained by a 'devil-may-care' gun-runner, bound for Imperial China with a hidden cargo of arms in a desperate attempt to break through the blockade of the Japanese navy as the Sino-Japanese War raged through the East. Predictably matters went wrong immediately and he and his comrades were running for their lives as a cruiser's shells crashed into their vessel. The epic sea conflict, the Battle of Yalu followed and in Port Arthur James Allen was accidentally left ashore as the Japanese forces took the city by storm and he had to run once again and fight for his life with bayonet and axe among the alleys and burning houses of the city to avoid the massacre of the population that followed. A thrilling race to safety brought more dangers on board a floating hulk and a Chinese junk before his eventual rescue. This is an astonishing true story-the very foundation for exactly the kind of fictional adventure that was so popular in the early twentieth century and formed the characters of many of the most well known heroes of that time. Available in soft cover and hard cover with dust jacket for collectors.

A Mythological Approach to Exploring the Origins of Chinese Civilization May 07 2020 Is the lion the symbol of China? Or should it be the dragon or the phoenix? This book makes a provocative interpretation of the Chinese ancient totems such as the bear and the owl. Taking a mythological approach, it explores the origin of Chinese civilization using the quadruple evidence method, which integrates ancient and unearthed literature, oral transmission, and archeological objects and graphs. It testifies to the authenticity of unresolved ancient myths and legends from the origins of Chinese Jade Ware (6200BC-5400 BC) to the names of the Yellow Emperor (2698-2598 BC) and the legends from the Xia (2010BC-1600BC), Shang (1600BC-046BC), Zhou (1046BC-771BC), and Qin (221BC-206BC) Dynasties. The book lays the foundation for a reconstruction of Chinese Mythistory. With well over 200 photographs of historic artifacts, the book appeals to both researchers and general readers.

David Jones and Rome Jul 09 2020 This interdisciplinary and archival study explores the reception of ancient Rome in the artistic, literary, and philosophical works of David Jones (1895-1974)—the Anglo-Welsh, Roman Catholic, First World War veteran. For Jones, the twentieth century was a period of crisis, an age of conflict, disillusionment and cultural decay, all of which he saw as evidence of the decline of Western civilisation. Across his lifetime, Jones would create a dynamic vision of ancient Rome in an attempt both to understand and to challenge this situation. His reimagining of Rome was not founded on a classical education. Instead, it was fashioned from his lived experience, extensive reading, and—most importantly—his engagement with four areas of contemporary discourse that were themselves built upon intricate and conflicting representations of Rome: British political rhetoric, cyclical history, the Catholic cultural revival, and the Welsh nationalist movement. Tracing Jones's developing approach to Rome across these contexts can provide a way into his art and thought. Whether in his poetic fragments, watercolours, essays, letters, marginalia or unique painted inscriptions, Jones strove to question, complicate and remake Rome's relationship with modernity. In this way, Rome appears in Jones's works both as a symbol of transhistorical imperialism, totalitarianism, and the mechanisation of life, and simultaneously as the cultural and religious progenitor of the West, and in particular, of Wales, with which artists must creatively reconnect if decline was to be avoided.

Dynasties (Xia, Shang and Zhou Dynasty) Nov 12 2020 The book is the volume of "The Military History of Remote Antiquity Period and The Three Dynasties (Xia, Shang and Zhou Dynasty)" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600-1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070-1600 BC) before the Shang, but no writing is known from the period. The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046-256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or "emperor" of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC - 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were

selected through difficult government examinations. China's last dynasty was the Qing (1644-1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood - the most recent being the Chinese Civil War (1927-1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.
