**The Creative Teacher** Jun 06 2020 Author James T. Charnock shares the best from his thirty-plus years' experience teaching language arts in *The Creative Teacher*, a teachers' guide filled with student activities in writing, public speaking, researching, dramatizing, and more. This is the second edition of the 2005 publication, *A Non-Workbook, Non-Textbook Approach to Teaching Language Arts*. Charnock's clarity, energetic style, and practical approach make this book a worthy addition to your teaching library. You will be impressed with how simple and fun teaching language arts can be when compared with the onerous and complicated methods propagated in the past. About the Author James T. Charnock, MEd, is a veteran teacher of more than thirty years at the elementary and junior high levels. For most of those years he was a certified reading-language arts specialist. In addition to creating educationally oriented market products, Charnock has been a feature writer/children's book reviewer for *The Reading Teacher*, a national reading journal, and has served on the editorial board of *Language Arts*, a national English journal. Former top students have honored Charnock four times in *Who's Who Among America's Teachers*. He has also been listed in *Who's Who in the East*. *The Creative Teacher* is Charnock's second edition to his 2005 publication, *A Non-Workbook, Non-Textbook Approach to Teaching Language Arts*. In addition, Charnock has published *Mt. Horeb: The Little White Schoolhouse on Little Deer Creek*, about the history and memories of one of Maryland's last one-room schoolhouses, where he started his education. Charnock lives in a suburb of Philadelphia, where he continues as a freelance writer, often serving as a seminar speaker on the teaching of writing and classroom art.

**Teaching the Nature of Science Through Process Skills** Apr 16 2021 Engage your students with inquiry-based lessons that help them think like scientists! "[This] book...has made such a difference in my teaching of science this school year. I have had some of the most amazing science lessons and activities with my students and I attribute this to what I learned from...[this] book... I have watched my 5th grade students go from being casual observers in science to making some amazing observations that I even missed. We enjoy our class investigations and the students ask for more!" --Alyce F. Surmann, Sembach Middle School "Teachers will relate well to the author's personal stories and specific examples given in the text, especially the ones about events in his own classroom.... like having the grasshoppers escape into the classroom!" --Andrea S. Martine, Director of Curriculum and Instruction, Warrior Run School District With Teaching the Nature of Science through Process Skills, author and science educator Randy Bell uses process skills you'll recognize, such as inference and observation, to promote an understanding of the characteristics of science knowledge. His personal stories, taken from years of teaching, set the stage for a friendly narrative that illuminates these characteristics of scientific knowledge and provides step-by-step guidance for implementing inquiry activities that help children understand such important, yet abstract, concepts. With Randy as your guide, you can better adhere to current science education standards that urge teachers to go beyond teaching science content to teach children about the practice and the nature of science in a way that engages all learners in grades three through eight. Investigate further... More than 50 ideas and activities for teaching the nature of science to help you meet content standards. A comprehensive framework to guide you in integrating the approach across the science curriculum, throughout the school year, and across the grade levels. A goldmine of reproducible resources, such as work sheets, notebook assignments, and more. Assessment guidance that helps you measure your students' nature of science understanding.

STEM to Story Oct 03 2022 Bring STEM to life for students with zombies, rockets, celebrities, and more STEM to Story: Enthralling and Effective Lesson Plans for Grades 5-8 inspires learning through fun, engaging, and meaningful lesson plans that fuse hands-on discovery in science, technology, engineering, and math (STEM) with creative writing. The workshop activities within the book are the innovative result of a partnership between 826 National's proven creative writing model and Time Warner Cable's Connect a Million Minds, an initiative dedicated to connecting young people to the wonders of STEM through hands-on learning. Authentically aligned with both the Common Core State Standards and the Next Generation Science Standards, this book provides teachers, after-school and out-of-school providers, and parents with field-tested lessons, workshops, and projects designed by professionals in each field. Including reflective observations by arts and science celebrities like Jon Scieszka, Mayim Bialik, and Steve Hockensmith, lessons feature bonus activities, fun facts, and teaching points for instructors at every level. These quirky, exploratory lessons will effectively awaken student imaginations and passions for both STEM and creative writing, encourage identity with scientific endeavors, and make both science and writing fun. Grades five through eight is the critical period for engaging students in STEM, and this book is designed specifically to appeal to – and engage – this age group. The guided curricula fosters hands-on discovery, deep learning, and rich inquiry skills while feeling more like play than school, and has proven popular and effective with both students and teachers. Awaken student imagination and get them excited about STEM Fuse creative writing with STEM using hands-on activities Make scientific principles relevant to students' lives Inspire students to explore STEM topics further The demand for STEM workers is closely linked to global competitiveness, and a successful future in STEM depends upon an early introduction to the scientific mindset. The challenge for teachers is to break through students' preconceptions of STEM fields as "hard" or "boring," to show them that STEM is everywhere, it's relevant, and it's loads of fun. For proven lesson plans with just a dash of weird, STEM to Story is a dynamic resource, adaptable and applicable in school, after school, and at home.
