[A History of Egypt](#) Jul 18 2021 Guides readers through the sometimes labyrinthine corridors of Egypt's past, from the mysterious predynastic kingdoms to the post-modern nation-state of the twenty-first century.

[The History of the United States for 1796](#) Nov 09 2020

**A History of Reading in the West** May 16 2021 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

**A History of the Jews** Sep 27 2019 A 4,000-year survey covering Jewish history and the impact of Jewish genius and imagination on the world.

[The History of the Popes, from the Close of the Middle Ages](#) Dec 31 2019

The History of the Book in 100 Books Feb 22 2022 Each of the 100 books chosen has played a critical role in the development of books in all their forms and with all that they bring: literacy, numeracy, technological progress and the expansion of scientific knowledge, religion, political theory, entertainment, and more.

**The History of Ireland** Jun 28 2022 Outlines the basic contours of Irish history, from prehistory to the two Irelands in 2000.

**The History of Grinding** Apr 26 2022 An in-depth examination of the oldest engineering process, The History of Grinding begins at the start of agriculture and outlines how size reduction developed over the centuries (without completely immersing the reader in technical detail). Great technical achievements have led to the machines of today, which can grind solid particles at the rate of tens of thousands of tons per day. One certainty is the existence of the continuing need for size reduction to develop and fit the lifestyles of people both today and in the future. Photos and illustrations gleaned from numerous sources, a glossary, reference list, and index enhance the text. Chapters include Size Reduction from the Stone Age to the Space Age; The Science and the Scientists; Hand Stones; Water Wheels, Windmills, and Beyond; Stamp Mills and Crushers; Roller Mills; Tumbling Mills; Fine-Grinding Mills; Classifiers; Explosive Rock Breakage; and Size Reduction in the 21st Century.

### **History, Medicine, and the Traditions of Renaissance**

**Learning** Mar 14 2021 A major, path-breaking work, History, Medicine, and the Traditions of Renaissance Learning is Nancy G. Siraisi's examination into the intersections of medically trained authors and history in the period 1450 to 1650. Rather than studying medicine and history as separate disciplinary traditions, Siraisi calls attention to their mutual interaction in the rapidly changing world of Renaissance erudition. Far from their contributions being a mere footnote in the historical record, medical writers had extensive involvement in the reading, production, and shaping of historical knowledge during this

important period. With remarkably detailed scholarship, Siraisi investigates doctors' efforts to explore the legacies handed down to them from ancient medical and anatomical writings and the difficult reconciliations this required between the authority of the ancient world and the discoveries of the modern. She also studies the ways in which sixteenth-century medical authors wrote history, both in their own medical texts and in more general historical works. In the course of her study, Siraisi finds that what allowed medical writers to become so fully engaged in the writing of history was their general humanistic background, their experience of history through the field of medicine's past, and the tools that the writing of history offered to the development of a rapidly evolving profession. Nancy G. Siraisi is one of the preeminent scholars of medieval and Renaissance intellectual history, specializing in medicine and science. Now Distinguished Professor Emerita of History at Hunter College and the Graduate Center, City University of New York, and a 2008 winner of a John D. and Catherine T. MacArthur Foundation Fellowship, she has written numerous books, including *Taddeo Alderotti and His Pupils* (Princeton, 1981), which won the American Association for the History of Medicine William H. Welch Medal; *Avicenna in Renaissance Italy* (Princeton, 1987); *The Clock and the Mirror* (Princeton, 1997); and the widely used textbook *Medieval and Early Renaissance Medicine* (Chicago, 1990), which won the Watson Davis and Helen Miles Davis Prize from the History of Science Society. In 2003 Siraisi received the History of Science Society's George Sarton Medal, in 2004 she received the Paul Oskar Kristellar Award for Lifetime Achievement of the Renaissance Society of America, and in 2005 she was awarded the American Historical Association Award for Scholarly Distinction. "A fascinating study of Renaissance physicians as avid readers and enthusiastic writers of all kinds of history: from case narratives and medical biographies to archaeological and environmental histories. In this wide-ranging book, Nancy Siraisi

demonstrates the deep links between the medical and the humanistic disciplines in early modern Europe." ---Katharine Park, Zemurray Stone Radcliffe Professor of the History of Science, Harvard University "This is a salient but little explored aspect of Renaissance humanism, and there is no doubt that Siraisi has succeeded in throwing light onto a vast subject. The scholarship is wide-ranging and profound, and breaks new ground. The choice of examples is fascinating, and it puts Renaissance documents into a new context. This is a major book, well written, richly learned and with further implications for more than students of medical history." ---Vivian Nutton, Professor, The Wellcome Trust Centre for the History of Medicine, University College London, and author of *From Democedes to Harvey: Studies in the History of Medicine* "Siraisi shows the many-dimensioned overlaps and interactions between medicine and 'history' in the early modern period, marking a pioneering effort to survey a neglected discipline. Her book follows the changing usage of the classical term 'history' both as empiricism and as a kind of scholarship in the Renaissance before its more modern analytical and critical applications. It is a marvel of erudition in an area insufficiently studied." ---Donald R. Kelley, Emeritus James Westfall Thompson Professor of History, Rutgers University, New Brunswick, and Executive Editor of *Journal of the History of Ideas*

to 1800. He assumes little knowledge of Chinese history or culture and compares the Chinese experience with books with that of other civilizations, particularly the European. Yet he deals with a wide range of issues in the history of the book in China and presents novel analyses of the changes in Chinese woodblock bookmaking over these centuries. He presents a new view of when the printed book replaced the manuscript and what drove that substitution. He explores the distribution and marketing structure of books, and writes fascinatingly on the history of book collecting and about access to private and government book collections. In drawing on a great deal of Chinese, Japanese, and Western research this book provides a broad account of the way Chinese books were printed, distributed, and consumed by literati and scholars, mainly in the lower Yangzi delta, the cultural center of China during these centuries. It introduces interesting personalities, ranging from wily book collectors to an indigent shoe-repairman collector. And, it discusses the obstacles to the formation of a truly national printed culture for both the well-educated and the struggling reader in recent times. This broad and comprehensive account of the development of printed Chinese culture from 1000 to 1800 is written for anyone interested in the history of the book. It also offers important new insights into book culture and its place in society for the student of Chinese history and culture. 'A brilliant piece of synthetic research as well as a delightful read, it offers a history of the Chinese book to the eighteenth century that is without equal.' - Timothy Brook, University of British Columbia 'Writers, scribes, engravers, printers, binders, publishers, distributors, dealers, literati, scholars, librarians, collectors, voracious readers — the full gamut of a vibrant book culture in China over one thousand years — are examined with eloquence and perception by Joseph McDermott in *The Social History of the Book*. His lively exploration will be of consuming interest to bibliophiles of every persuasion.' - Nicholas A. Basbanes, author of *A Gentle Madness*,

Patience and Fortitude, A Splendor of Letters, and Every Book Its Reader Joseph McDermott is presently Fellow of St John's College, Cambridge, and University Lecturer in Chinese at Cambridge University. He has published widely on Chinese social and economic history, most recently on the economy of the Song (or, Sung) dynasty for the Cambridge History of China. He has edited *State and Court Ritual in China* and *Art and Power in East Asia*.

**The Columbia History of Western Philosophy** Jan 12 2021 A chronological survey of the evolution of Western philosophy provides historical analysis of the thought of key figures and schools and explores the broad influence of Jewish, Islamic, and Asian philosophy, the importance of women philosophers, and other topics. UP.

**The History of English Law Before the Time of Edward I** Sep 07 2020 Sir Frederick Pollock and Frederic William Maitland's legal classic *The History of English Law before the Time of Edward I* expanded the work of Sir Edward Coke and William Blackstone by exploring the origins of key aspects of English common law and society and with them the development of individual rights as these were gradually carved out from the authority of the Crown and the Church. Book one examines Anglo-Saxon law, goes on to consider the changes in law introduced by the Normans, then moves to the twelfth-century Age of Glanvill followed by the thirteenth century Age of Bracton. Book two takes up different areas of English law by topic, including land tenure, marriage and wardship, fealty, the ranks of men both free and unfree, aliens, Jews, excommunicates, women, and the churches and the King, before turning to the various jurisdictions of that decentralised era.

gathered into a single title! The Who Was? History of the World is a journey along the timeline of history, noting the birthdays of 150 people in the series and what was happening in the world at that moment in time. Follow the timeline to learn who was doing what when, from the days of ancient Egypt, all the way up to the present.

**History of Shit** Aug 19 2021 "A brilliant account of the politics of shit. It will leave you speechless." Written in Paris after the heady days of student revolt in May 1968 and before the devastation of the AIDS epidemic, History of Shit is emblematic of a wild and adventurous strain of 1970s' theoretical writing that attempted to marry theory, politics, sexuality, pleasure, experimentation, and humor. Radically redefining dialectical thought and post-Marxist politics, it takes an important—and irreverent—position alongside the works of such postmodern thinkers as Foucault, Deleuze, Guattari, and Lyotard. Laporte's eccentric style and ironic sensibility combine in an inquiry that is provocative, humorous, and intellectually exhilarating. Debunking all humanist mythology about the grandeur of civilization, History of Shit suggests instead that the management of human waste is crucial to our identities as modern individuals—including the organization of the city, the rise of the nation-state, the development of capitalism, and the mandate for clean and proper language. Far from rising above the muck, Laporte argues, we are thoroughly mired in it, particularly when we appear our most clean and hygienic. Laporte's style of writing is itself an attack on our desire for "clean language." Littered with lengthy quotations and obscure allusions, and adamantly refusing to follow a linear argument, History of Shit breaks the rules and challenges the conventions of "proper" academic discourse.

present state of the field, the Companion has no peer." Choice "If you want to understand how cultures come into being, endure, and change, then you need to come to terms with the rich and often surprising history Of the book ... Eliot and Rose have done a fine job. Their volume can be heartily recommended. " Adrian Johns, *Technology and Culture* From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. Contributors to this volume: Michael Albin, Martin Andrews, Rob Banham, Megan L Benton, Michelle P. Brown, Marie-Françoise Cachin, Hortensia Calvo, Charles Chadwyck-Healey, M. T. Clanchy, Stephen Colclough, Patricia Crain, J. S. Edgren, Simon Eliot, John Feather, David Finkelstein, David Greetham, Robert A. Gross, Deana Heath, Lotte Hellinga, T. H. **Index, A History of the: A Bookish Adventure from Medieval Manuscripts to the Digital Age** Jan 24 2022

A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it's just where you go to look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years.

is a fundamentally peaceful religion and that Islamic jihad terrorism is something relatively new, a product of the economic and political ferment of the twentieth century. But in *The History of Jihad: From Muhammad to ISIS*, Islamic scholar Robert Spencer proves definitively that Islamic terror is as old as Islam itself, as old as Muhammad, the prophet of Islam, who said "I have been made victorious through terror." Spencer briskly traces the 1,400-year war of Islamic jihadis against the rest of the world, detailing the jihad against Europe, including the 700-year struggle to conquer Constantinople; the jihad in Spain, where non-Muslims fought for another 700 years to get the jihadi invaders out of the country; and the jihad against India, where Muslim warriors and conquerors wrought unparalleled and unfathomable devastation in the name of their religion. Told in great part in the words of contemporary chroniclers themselves, both Muslim and non-Muslim, *The History of Jihad* shows that jihad warfare has been a constant of Islam from its very beginnings, and present-day jihad terrorism proceeds along exactly the same ideological and theological foundations as did the great Islamic warrior states and jihad commanders of the past. *The History of Jihad: From Muhammad to ISIS* is the first one-volume history of jihad in the English language, and the first book to tell the whole truth about Islam's bloody history in an age when Islamic jihadis are more assertive in Western countries than they have been for centuries. This book is indispensable to understanding the geopolitical situation of the twenty-first century, and ultimately to formulating strategies to reform Islam and defeat radical terror.

an original and richly illustrated narrative that is global in scope. The history of the book is the history of millions of written, printed, and illustrated texts, their manufacture, distribution, and reception. Here are different types of production, from clay tablets to scrolls, from inscribed codices to printed books, pamphlets, magazines, and newspapers, from written parchment to digital texts. The history of the book is a history of different methods of circulation and dissemination, all dependent on innovations in transport, from coastal and transoceanic shipping to roads, trains, planes and the internet. It is a history of different modes of reading and reception, from learned debate and individual study to public instruction and entertainment. It is a history of manufacture, craftsmanship, dissemination, reading and debate. Yet the history of books is not simply a question of material form, nor indeed of the history of reading and reception. The larger question is of the effect of textual production, distribution and reception - of how books themselves made history. To this end, each chapter of this volume, succinctly bounded by period and geography, offers incisive and stimulating insights into the relationship between books and the story of their times.

The Moon Aug 26 2019 An intimate portrait of the Earth's closest neighbor--the Moon--that explores the history and future of humankind's relationship with it Every generation has looked towards the heavens and wondered at the beauty of the Moon. Fifty years ago, a few Americans became the first to do the reverse--and shared with Earth-bound audiences the view of their own planet hanging in the sky instead. Recently, the connection has been discovered to be even closer: a fragment of the Earth's surface was found embedded in a rock brought back from the Moon. And astronauts are preparing to return to the surface of the Moon after a half-century hiatus--this time to the dark side. Oliver Morton explores how the ways we have looked at the Moon have shaped our perceptions of the Earth: from the controversies

of early astronomers such as van Eyck and Galileo, to the Cold War space race, to the potential use of the Moon as a stepping stone for further space exploration. Advanced technologies, new ambitions, and old dreams mean that men, women, and robots now seem certain to return to the Moon. For some, it is a future on which humankind has turned its back for too long. For others, an adventure yet to begin.

**What is the History of the Book?** Oct 01 2022 James Raven, a leading historian of the book, offers a fresh and accessible guide to the global study of the production, dissemination and reception of written and printed texts across all societies and in all ages. Students, teachers, researchers and general readers will benefit from the book's investigation of the subject's origins, scope and future direction. Based on original research and a wide range of sources, *What is the History of the Book?* shows how book history crosses disciplinary boundaries and intersects with literary, historical, media, library, conservation and communications studies. Raven uses examples from around the world to explore different traditions in bibliography, palaeography and manuscript studies. He analyses book history's growing global ambition and demonstrates how the study of reading practices opens up new horizons in social history and the history of knowledge. He shows how book history is contributing to debates about intellectual and popular culture, colonialism and the communication of ideas. The first global, accessible introduction to the field of book history from ancient to modern times, *What is the History of the Book?* is essential reading for all those interested in one of society's most important cultural artefacts.

The American College and University May 04 2020 First published in 1962, Frederick Rudolph's groundbreaking study, *The American College and University*, remains one of the most useful and significant works on the history of higher education in America. Bridging the chasm between educational and social history, this book was one of the first to examine developments in

higher education in the context of the social, economic, and political forces that were shaping the nation at large. Surveying higher education from the colonial era through the mid-twentieth century, Rudolph explores a multitude of issues from the financing of institutions and the development of curriculum to the education of women and blacks, the rise of college athletics, and the complexities of student life. In his foreword to this new edition, John Thelin assesses the impact that Rudolph's work has had on higher education studies. The new edition also includes a bibliographic essay by Thelin covering significant works in the field that have appeared since the publication of the first edition. At a time when our educational system as a whole is under intense scrutiny, Rudolph's seminal work offers an important historical perspective on the development of higher education in the United States.

**The History of the Mohammedan Dynasties in Spain** May 28 2022 This is the original History of the Modammedan Dynasties of Spain reprinted from the first edition of 1840-1843. It represents the foundations of our modern understanding of a great civilisation.

**The History of Karate and the Masters Who Made It** Apr 02 2020 A concise yet comprehensive history of traditional Okinawan and Japanese karate, with biographies of the great karate masters. This concise-yet-comprehensive history of traditional Okinawan and Japanese karate includes authoritative biographies of the great karate masters of the past and the philosophical issues they faced as karate changed and evolved. Bringing a fresh understanding to the study of the martial arts, Mark I. Cramer dispels many of the often-repeated martial-arts myths as he details the lineages of the modern styles of karate and describes the social, cultural, and political events that influenced them. While most books focus on a single style of karate or the biography of just one of the great teachers, this book offers a well-researched and detailed overview. By bringing all of this

the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.

**The History of Inclusion in the United States** Oct 28 2019 As a significant term, inclusion came into use relatively recently in the long history of special education in the United States. Since the 1800s, when children with disabilities first were segregated for instruction in public schools, professionals and parents have called for more equitable, "normal" treatment of these students, and for closer contact with their nondisabled peers. Through the years, the central issues of the discussions between educators and parents have focused on who should be considered disabled and who should bear responsibility for planning and providing for their education. *The History of Inclusion in the United States* traces the antecedents of this ongoing debate to answer questions about what inclusion is, how it came to be, and where it might go. In this comprehensive study, author Robert L. Osgood reveals how the idea of inclusion has evolved into broader realms of thought and practice. In its earliest manifestations, educators dwelled upon the classroom setting itself, wondering whether "disabled" children belonged there; if not, why not; and if so, how this could be accomplished? By the late 1960s, the scope of the discussion had shifted to assess the comprehensive structures of special education and its relationship with general education. *The History of Inclusion* seamlessly follows this progression into the present decade, in which current educational policy questions the need for any sort of separate "special education" in principle and structure.

of counting and calculating from the time of the cave dwellers to the late twentieth century, *The Universal History of Numbers* is the first complete account of the invention and evolution of numbers the world over. As different cultures around the globe struggled with problems of harvests, constructing buildings, educating their citizens, and exploring the wonders of science, each civilization created its own unique and wonderful mathematical system. Dubbed the "Indiana Jones of numbers," Georges Ifrah traveled all over the world for ten years to uncover the little-known details of this amazing story. From India to China, and from Egypt to Chile, Ifrah talked to mathematicians, historians, archaeologists, and philosophers. He deciphered ancient writing on crumbling walls; scrutinized stones, tools, cylinders, and cones; and examined carved bones, elaborately knotted counting strings, and X-rays of the contents of never-opened ancient clay accounting balls. Conveying all the excitement and joy of the process of discovery, Ifrah writes in a delightful storytelling style, recounting a plethora of intriguing and amusing anecdotes along the way. From the stories of the various ingenious ways in which different early cultures used their bodies to count and perfected the use of the first calculating machine—the hand—to the invention of different styles of tally sticks, up through the creation of alphabetic numbers, the Greek and Roman numeric systems, and the birth of modern numerals in ancient India, we are taken on a marvelous journey through humankind's grand intellectual epic. We meet those who only count to four—anything more is "a lot"; discover the first uses of counting fingers and toes; learn of the amazing ability of abacus users to calculate with brilliant efficiency; and ponder the intriguing question: How did many cultures manage to calculate for all those centuries without a zero? Exploring the many ways civilizations developed and changed their mathematical systems, Ifrah imparts a unique insight into the nature of human thought—and into the ways our understanding of numbers and how they

shape our lives has slowly changed and grown over thousands of years. In this illuminating and entertaining work, you'll learn about: The earliest calculating machine--the hand Tally sticks--accounting for beginners How the Sumerians did their sums Greek and Roman numerals The invention of alphabetic numerals The achievements of the Mayan civilization India and the birth of modern numbers Indo-Arabic numerals and how they reached the West The final stage of numerical notation Praise for The Universal History of Numbers "Let us start the year with a bang. Georges Ifrah is the man. This book, quite simply, rules. . . . It is outstanding, and not least because it has been written from first principles, for people like you and me, curious but by no means expert . . . a mind-boggling and enriching experience."-The Guardian "Pursuing the invention of numbers across civilizations, Georges Ifrah has written the grand story of human ingenuity. . . . His amazing undertaking, describing humankind's relationship with numbers from Paleolithic times to the computer age, spans the world from Mayan ruins to Indian museums, from Egyptian hieroglyphics to Greek philosophers to Chinese libraries."-Le Figaro "Follow the astonishing path of Georges Ifrah, the Indiana Jones of arithmetic . . . who decided in 1974 to begin the search for his Grail, the origin of numbers. Journeying over mountains and across valleys, he discovered how-from Mayan to Chinese, from Indian to Egyptian-humankind has juggled numbers."-Express "Ifrah's book amazes and fascinates . . . It is nothing less than the history of the human race told through figures."-International Herald Tribune

**The History of Love: A Novel** Aug 07 2020 ONE OF THE MOST LOVED NOVELS OF THE DECADE. A long-lost book reappears, mysteriously connecting an old man searching for his son and a girl seeking a cure for her widowed mother's loneliness. Leo Gursky taps his radiator each evening to let his upstairs neighbor know he's still alive. But it wasn't always like this: in the Polish

village of his youth, he fell in love and wrote a book...Sixty years later and half a world away, fourteen-year-old Alma, who was named after a character in that book, undertakes an adventure to find her namesake and save her family. With virtuosic skill and soaring imaginative power, Nicole Krauss gradually draws these stories together toward a climax of "extraordinary depth and beauty" (Newsday).

**The History of Bones** Mar 26 2022 The quintessential depiction of 1980s New York and the downtown scene from the artist, actor, musician, and composer John Lurie "A picaresque roller coaster of a story, with staggering amounts of sex and drugs and the perpetual quest to retain some kind of artistic integrity."—The New York Times In the tornado that was downtown New York in the 1980s, John Lurie stood at the vortex. After founding the band The Lounge Lizards with his brother, Evan, in 1979, Lurie quickly became a centrifugal figure in the world of outsider artists, cutting-edge filmmakers, and cultural rebels. Now Lurie vibrantly brings to life the whole wash of 1980s New York as he developed his artistic soul over the course of the decade and came into orbit with all the prominent artists of that time and place, including Andy Warhol, Debbie Harry, Boris Policeband, and, especially, Jean-Michel Basquiat, the enigmatic prodigy who spent a year sleeping on the floor of Lurie's East Third Street apartment. It may feel like Disney World now, but in *The History of Bones*, the East Village, through Lurie's clear-eyed reminiscence, comes to teeming, gritty life. The book is full of grime and frank humor—Lurie holds nothing back in this journey to one of the most significant moments in our cultural history, one whose reverberations are still strongly felt today. History may repeat itself, but the way downtown New York happened in the 1980s will never happen again. Luckily, through this beautiful memoir, we all have a front-row seat.
