[Cindy in Iraq](#) Mar 17 2021 Cindy in Iraq is Cynthia Morgan's hair-raising yet jubilant chronicle of her perilous year in war-torn Iraq as a truck driver -- the most dangerous civilian job in the war zone. In the summer of 2003, a friend in the National Guard stationed in Iraq wrote to Morgan about KBR, a Halliburton subsidiary that was hiring drivers. Morgan was from a family with a long military history; her oldest son was in the National Guard at the time. Wanting to do her part for her country and struggling financially after leaving her abusive third husband, Cindy decided she was "tired of surviving her life and not living it." She left everything and everyone behind and set out for Kuwait and Iraq to be a truck driver for KBR. She felt Iraq would give her the opportunity she needed to make some changes in her life. Her three sons, then ages 18, 16, and 15, along with the rest of her family, supported her decision, but made her promise that she would always tell them the truth about what she was going through as a driver in Iraq. Drawn in part from the emails she posted home and the journals she kept, Cindy in Iraq re-creates in vivid detail how Morgan overcame the stigma of being one of the rare female truck drivers and quickly rose through the ranks to become a convoy commander. She led her fellow Reefer Cowboys -- "reefer" is short for "refrigerated truck" -- in convoys that delivered necessary goods to soldiers stationed in such notorious hot spots as Baghdad Airport, Camp Anaconda -- a place as dangerous as its name -- and Fallujah. A moving target for insurgents and with virtually no training, and unarmed as well, she faced being ambushed and shot at, all while learning how to navigate Iraq's difficult terrain. As the insurgency heated up, contractors were in more and more peril, increasingly kidnapped and executed. By the time Cindy's year in Iraq was up, she had shrapnel in her arm. She also discovered that there are times when the enemy can be someone you know. Cindy's journey to Iraq was also a voyage of self-discovery: "I knew that I would find out who I am and what I am made of here.... Honor, integrity, pride, and humanity can all be discovered. I know that I still am a very passionate person when it comes to the things I believe in.... I am still me, but more.... So my story of being over here is not just one of a female truck driver driving in a war zone in Iraq. It is a story of me finding the world, and of me finding me." Cindy's is an eyewitness account of war that few journalists can offer: The grateful Iraqi children, the hardworking U.S. soldiers, and the personal stories of soldiers and civilians alike thrown together in a war unlike any other the United States has ever fought.

Lessons from a Warzone Nov 24 2021 One day, everything is going well; the next, disaster strikes. What do you do when every pillar is collapsing, every rule is being broken and chaos seems to be all around you? 'Pessimism be damned. This man steered his bank through four years of a hellish civil war - and the lessons he learnt will benefit us all.' Sathnam Sanghera, author of EmpireLand _____ An inspiring story of resilient leadership in the toughest of times. Louai Al Roumani was head of finance and planning at one of the largest banks in Syria when the war broke out in 2011. In Lessons from a Warzone, Al Roumani shares his very personal account of coping with the day-to-day realities of leading an organization in dangerous and hostile conditions. His story shows how inspiration can come from the unlikeliest of places, and how a business can not only survive in chaos, but can learn to thrive - the bank became the undisputed sector leader as people's trust in its capability to protect their life-long savings strengthened. In this book, Al Roumani distils the knowledge and skills he and his colleagues developed while

steering the bank through four impossible years into ten lessons applicable to any leader facing a crisis today. His valuable and often counterintuitive advice will help anyone understand how to be resilient even in the most challenging of times. _____ 'A compelling guide for leaders grappling with the pandemic... the lessons in resilient leadership in turbulent times that Roumani offers are universal.' Pilita Clark, Financial Times 'Contains powerful lessons about resilience that show how companies can come out of crises better and stronger if they focus on long-term opportunities, no matter how tough it gets in the short term' Ana Botín, executive chair, Banco Santander

Drug War Zone Aug 22 2021 Thousands of people die in drug-related violence every year in Mexico. Ciudad Juárez, Chihuahua, adjacent to El Paso, Texas, has become the most violent city in the Mexican drug war. Much of the cocaine, marijuana, and methamphetamine consumed in the United States is imported across the Mexican border, making El Paso/Juárez one of the major drug-trafficking venues in the world. In this anthropological study of drug trafficking and anti-drug law enforcement efforts on the U.S.-Mexico border, Howard Campbell uses an ethnographic perspective to chronicle the recent Mexican drug war, focusing especially on people and events in the El Paso/Juárez area. It is the first social science study of the violent drug war that is tearing Mexico apart. Based on deep access to the drug-smuggling world, this study presents the drug war through the eyes and lives of direct participants. Half of the book consists of oral histories from drug traffickers, and the other half from law enforcement officials. There is much journalistic coverage of the drug war, but very seldom are the lived experiences of traffickers and "narcs" presented in such vivid detail. In addition to providing an up-close, personal view of the drug-trafficking world, Campbell explains and analyzes the functioning of drug cartels, the corruption that facilitates drug trafficking, the strategies of smugglers and anti-narcotics officials, and the perilous culture of drug trafficking that Campbell refers to as the "Drug War Zone."

Dispatches from the War Zone Jan 15 2021 Exposing the social and political landscape of homelessness in Fresno, Dispatches from the War Zone offers the reader a rare opportunity to understand this issue from the perspective of the homeless, their allies and an investigative journalist who closely followed this story for more than 10 years. What at first appeared to be builders and developers working with Fresno City Hall and the police to move the homeless to more remote areas of town turns into something else entirely. We find government corruption, a class action lawsuit against the city for its unconstitutional attacks against the homeless and the suspicious death of Pamela Kincaid, the lead plaintiff in the legal action. Originally, it was the federal government's de-funding of affordable housing in the early 1980s that led to today's homeless crisis. The book examines those structural reasons for homelessness but also looks at what grassroots groups in Fresno, working on alternatives, have accomplished. Although the end to homelessness has been elusive for those groups doing business as usual, the paradigm shifts this book suggests give new hope that a better world is possible. There is a pathway to ending homelessness and treating all people with the dignity and respect they deserve.

Will They Ever Trust Us Again? May 07 2020 American soldiers serve willingly. They risk their lives so the rest of us can be safe. The one small thing they ask, though, is that they not be sent into harm's way unless it is absolutely necessary. But after being lied to about weapons of mass destruction and about the connection between al Qaeda and Iraq; after being forced by stop-loss orders to extend their deployment; after being undertrained, underequipped, and overworked long after George Bush declared Iraq "Mission Accomplished," these soldiers have something to say. From his famous 2003 Oscar acceptance speech to his record-breaking documentary Fahrenheit 9/11, Michael Moore has been an outspoken critic of the Bush administration and the war in Iraq. But in this book, Moore gives the spotlight to the real heroes of protest: the men and women who have fought in Iraq and want the American public to know how they feel about their mission and their commander in chief. Moore also fields letters from veterans of other wars and mothers, wives, and siblings of our heir anger and frustration, their tears and pain, and their hopes and prayers. Impassioned, accessible, and moving, these are letters that reveal the true hearts and minds of the men, women, and families on the front line.

Life in the War Zone Apr 29 2022 PARIS, August 8, 1916. France to-day is sharply divided into two sections; within the greater you can come and go almost as freely as before the war. All that is necessary is a *sauf conduit* easily obtained from your commissaire de police, which you are never called upon to exhibit. But the other, the *Zone des Armées*, in common parlance the war or military zone! There is only one thing in France more difficult of contact, and that is a member of the middle or lower bourgeoisie. For nearly three months now I have felt like an inverted snob trying to ingratiate myself with, or even to meet members, of that curious caste which exists only in France; a caste reserved, proud, suspicious, intensive, detesting foreigners only less than it does the aristocracy, and averse from variety of any sort. If you bring even one letter to society, either in France or any European capital, all doors are open to you, for society is accustomed to strangers and variety, and is often bored with itself; which the bourgeoisie, of France at least, never seems to be. So, if in the course of these and other letters, I allude, however casually, to princesses and duchesses, spare me the ready democratic sneer; but if, with affected indifference, I mention now and again a name without territorial significance, then, if you like, exchange derisive glances and exclaim: "Aha! So she has 'got there' and would have us believe she takes it as a matter of course." However—to return to the war zone.

Surviving the Warzone Mar 05 2020 I could feel blood pouring from my nose and lips, my eyes opened slowly with a side long glance and a flash of my eyes I could see this burly man with this thick neck and a dark deep scared face sitting on me striking down on me with lefts and rights. I always believed by striking me he cleared the cob webs from my brain. As soon as my head cleared a little, I quickly grabbed him by his face pulling him down to me, biting him on his face. Holding him with my left banging him with short right hands, I tried to rip him off me by reaching around with my left hand and grabbing his mouth, he bit down on my fingers ripping off two finger nails. I just remember him being so heavy, I was gasping for breath I was spent I felt myself going, I could sense there was an all out war going on around me.

Women in the War Zone Feb 13 2021 In our collective memory, the First World War is dominated by men. The sailors, soldiers, airmen and politicians about whom histories are written were male, and the first half of the twentieth century was still a time when a woman's place was thought to be in the home. It was not until the Second World War that women would start to play a major role both in the armed forces and in the factories and the fields. Yet there were some women who were able to contribute to the war effort between 1914 and 1918, mostly as doctors and nurses. In *Women in the War Zone*, Anne Powell has selected extracts from first-hand accounts of the experiences of those female medical personnel who served abroad during the First World War. Covering both the Western and the Eastern Fronts, from Petrograd to Basra and from Antwerp to the Dardanelles, they include nursing casualties from the Battle of Ypres, a young doctor put in charge of a remote hospital in Serbia and a nurse who survived a torpedo attack, albeit with serious injuries. Filled with stories of bravery and kindness, it is a book that honours the often unsung contribution made by the female doctors and nurses who helped to alleviate some of the suffering of the First World War.

War Zones Oct 12 2020 We tend to think of war as being fought in specific, bounded places--war zones. But since the end of World War II, warfare has taken different forms, with the wars

themselves often undeclared and their battlegrounds ill-defined. This book addresses that shift. War Zones examines the people, landscapes, and built environments that are subject to both the civil and military aims and control of armed conflicts today. From colonial or total war, asymmetric war or counterinsurgency to barricaded or besieged cities, refugee camps or borderlines, to nuclear bunkers or "war ghosts," to states of emergency and drone warfare, these texts disclose the complicated spatial aspects and process of formation of war zones past and present.

The War Zone is My Bed Aug 10 2020 The war zone is my bed and other plays follows journeys of spiritual destruction and redemption from the banks of the Mississippi River to the conflicted streets of Sarajevo and Kabul, only to return to the fallen levees surrounding New Orleans, as the characters attempt to seek and sustain love in violent circumstances.

From the Comfort Zone to the War Zone Apr 17 2021 Apostasy or Falling Away from the Faith" is commonly thought in Christian theology to characterize the church in its last hour before the antichrist appears and leads to God's judgment of the world. If you have been walking with the Lord in intimacy you know very well that Satan, the father of all lies is constantly throwing lies at you from the pit of hell. But God through the Holy Spirit brings us comfort and love in our cast down times. Like the apostle Paul, we then say, "I am filled with comfort, I am exceedingly joyful in all tribulation." (2 Corinthians 7:4) We do have tribulations but it is at times like these that we must get our focus away from the situation and stop fretting about it. Instead get up seek out and bring the Word of God to those who wait to be filled with the Spirit through God's Word. Stop trying to please God by planning some great sacrificial work, or raising money for a new building project or organizing a new Christian venture to help the needy. Likewise, dutifully attending Church, singing in the choir, heading church committees and beautifying the sanctuary with flowers and candles is not the answer. It seems all well because it shows our desire to worship the Lord, but it is not what the Lord expects from us during these last days. He wants us to leave the comfort of the Church sanctuary and walk, "I mean run" outside and seek out the hurting souls to bring them God's healing. Remember, we have been given all the power of heaven to console a hurting soul, someone who needs to hear that God is real and answering the Cry of the Lost."

Fred Mitchell's War Story Jul 29 2019 Excerpt from Fred Mitchell's War Story: Three Years in the War Zone My chief object in bringing out this volume of my experiences during the early part of the war has been to convey to American readers a true idea of what non-combatants in the invaded country, as well as close to the battle lines, were compelled to undergo. There has also been a wish on my part that this book may help me in bringing some slight measure of relief to many little orphans, most of whose parents I once knew, and to older but just as helpless sufferers. I vouch for the truth of everything I relate. It will be observed that these pages contain very little that is based on hearsay evidence. Nearly everything in them is the result of personal observation, purchased at a heavy cost in the way of danger and hardship. My happiness will be great if I can help a little to bring about a true realization of the menace which the German Empire, as at present constituted, is to the rest of humanity, and how absolutely necessary it is that its crushing power should be for ever broken. Making Love in a War Zone Aug 29 2019 Can racism and intimacy co-exist? Can love and friendship form and flourish across South Africa's imposed colour lines? Who better to engage on the subject of hazardous liaisons than the students Jonathan Jansen served over seven years as Vice Chancellor of the University of the Free State, in South Africa. The context is the University campus in Bloemfontein, the City of Roses, the Mississippi of South Africa. Rural, agricultural, insular, religious and conservative, this is not a place for breaking out. But over the years, Jansen observed shifts in campus life and noticed more and more openly interracial friendships and couples, and he began having conversations with these students with burning questions in mind. Ten interracial couples tell their stories of love and friendship in their own words, with a focus on how these students experience the world of interracial relationships, and how flawed, outdated laws and customs set limits on human relationships, and the long shadow they cast on learning, living and loving on university campuses to this day.

REMF Diary Jun 27 2019 This is how it was to be a REMF in Vietnam- the ice cream, the Coca Cola, the air conditioning, the clean, starched jungle fatigues, and yes, the parades and the whores, I leave nothing out; it is all in there. The typing and the saluting, too." With this, David Willson sets the tone for REMF Diary. Between these covers is a very funny, ironic novel of the Vietnam War. It is a story told by an army clerk stationed in Saigon. His perceptions of the war and of the paper war around him make for hilarious reading.
