We Fought the Road Sep 27 2019 *We Fought the Road* is the story of the building of the Alaska-Canada Highway during World War II. More than one third of the 10,607 builders were black;

thought to be incapable of performing on a war front by many of their white commanding officers. Their task--which required punching through wilderness on a route blocked by the Rocky Mountains and deadly permafrost during the worst winter on record--has been likened to the building of the Panama Canal. Unlike most accounts that focus on the road's military planners, *We Fought the Road* is boots-on-the-ground and often personal, based in part on letters from the "Three Cent Romance," the successful courtship via mail discovered in the authors' family papers

Electromagnetic Scattering in Disperse Media Apr 14 2021 This is the first book devoted specifically to the problem of light scattering and absorption by inhomogeneous and anisotropic spherical particles. Unlike other books in the field, *Electromagnetic Scattering in Disperse Media* pays considerable attention to various aspects of light absorption inside particles, including internal field distributions, MDR resonances, and absorption in restricted regions inside particles. It contains many results (and more than 100 figures) computed for polydisperse particle systems and algorithms and provides the possibility to use them (web site). Although the main emphasis is given to optical properties of atmospheric aerosol, the book also deals with many other practical applications involving inhomogeneous and anisotropic particles

Academic E-Books Mar 26 2022 E-Books in Academic Libraries: Stepping Up to the Challenge

provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Lessons from the Lobster Feb 10 2021 How forty years of research on thirty neurons in the stomach of a lobster has yielded valuable insights for the study of the human brain. Neuroscientist Eve Marder has spent forty years studying thirty neurons on the stomach of a lobster. Her focus on this tiny network of cells has yielded valuable insights into the much more complex workings of the human brain; she has become a leading voice in neuroscience. In *Lessons from the Lobster*, Charlotte Nassim describes Marder's work and its significance accessibly and engagingly, tracing the evolution of a supremely gifted scientist's ideas. From the lobster's digestion to human thought

is very big leap indeed. Our brains selectively recruit networks from about ninety billion available neurons; the connections are extremely complex. Nevertheless, as Nassim explains, Marder's study of a microscopic knot of stomatogastric neurons in lobsters and crabs, a small network with a countable number of neurons, has laid vital foundations for current brain research projects. Marder's approach is as intuitive as it is analytic, but always firmly anchored to data. Every scrap of information is a pointer for Marder; her discoveries depend on her own creative thinking as much as her laboratory's findings. Nassim describes Marder's important findings on neuromodulation, the secrets of neuronal networks, and homeostasis. Her recognition of the importance of animal-to-animal variability has influenced research methods everywhere. Marder has run her laboratory at Brandeis University since 1978. She was President of the Society for Neuroscience in 2008 and she is the recipient of numerous awards, including the 2016 Kavli Award in Neuroscience and the 2013 Gruber Prize in Neuroscience. Research that reaches the headlines often depends on technical fireworks, and especially on spectacular images. Marder's work seldom fits that pattern, but this book demonstrates that a brilliant scientist working carefully and thoughtfully can produce groundbreaking results.

The First World War, 1914-1918; Personal Experiences Of Lieut.-Col. C. À Court Repington Vol. II [Illustrated Edition] Dec 23 2021 Includes the First World War Illustrations Pack - 73 battle plans and diagrams and 198 photos A fascinating history of the First World War seen through the eyes of a highly respected and connected War Correspondent. Lieut.-Col. Charles à Court Repington was a career soldier in the British Army; renowned for his service in the Sudan, Burma and the Boer War, he was drummed out of the service for having an affair with the wife of British official in 1902. He was well known as an excellent staff officer and remained closely tied to the

comrades that he had fought and served with including the future leaders of the British Army in the First World War. Cutting his teeth as a war correspondent during the Russo-Japanese War of 1904-1905, he was ideally placed as the War Correspondent of the Times when war broke out in 1914 to report on the unfolding tragedy. Using all of his connections and influence he visited the Western Front many times and was in intimate correspondence and contact with the senior figures of the British Army such as Sir John French, Sir Douglas Haig, Herbert Plumer and Horace Smith-Dorrien. No great respecter of private conversations or confidences he lost many friends when he wrote *The First World War*; his work was critical, well-written, caustic and unbiassed. These classic memoirs remain as valuable and vivid as they were when they were written. This second volume covers the period from spring 1917 until the end of the war.

A Complete Dictionary of the English Language Jan 12 2021

Vatican II Mar 02 2020 From 1962 to 1965, in perhaps the most important religious event of the twentieth century, the Second Vatican Council met to plot a course for the future of the Roman Catholic Church. After thousands of speeches, resolutions, and votes, the Council issued sixteen official documents on topics ranging from divine revelation to relations with non-Christians. In many ways, though, the real challenges began after the council was over and Catholics began to argue over the interpretation of the documents. Many analysts perceived the Council's far-reaching changes as breaks with Church tradition, and soon this became the dominant bias in the American and other media, which lacked the theological background to approach the documents on their own terms. In *Vatican II: Renewal Within Tradition*, an international team of theologians offers a different reading of the documents from Vatican II. The Council was indeed putting forth a vision for the future of the Church, but that vision was grounded in two millennia of tradition. Taken together,

these essays demonstrate that Vatican II's documents are a development from an established antecedent in the Roman Catholic Church. Each chapter contextualizes Vatican II teachings within that rich tradition. The resulting book is an indispensable and accessible companion to the Council's developments, one that focuses on theology and transcends the mass-media storyline of "liberal" versus "conservative."

Catechism Of The Catholic Church Revised PB Jan 24 2022 The first edition of the new Catechism went out across the world in many language versions. This gave the local Churches the chance to study it in depth. Through their bishops and teachers they responded with comments on texts that needed refinement. The present edition was developed in the light of these comments and published in Latin as the definitive Editio Typica. This book is the English translation of the Editio Typica.

A Privileged Moment Jun 16 2021 This book is the first major study to analyse the word 'dialogue' in the documents of the Second Vatican Council. 'Dialogue' actually translates two different Latin words, colloquium and dialogus, which do not mean the same thing. After a clear explanation of the important distinction between the dialectic of Thomism, where dialogue leads to an end-point, and the modern meaning of dialogue as an open-ended process between equal partners, the book argues that these dissimilar concepts became blurred in the documents of the Council. A careful analysis of

the interpretation of this word in a comparison across five major English translations of the documents demonstrates how the rhetorical power of dialogue was manipulated depending on how it was translated. A provocative assessment of the significance of the different contexts in which each word was used offers a new insight: the existence of a two-tier system of dialogue depending on who was the Church's partner in dialogue. Nonetheless the conclusion illuminates a common subtext to all uses of dialogue and illustrates how it is possible to receive Vatican II in the twenty-first century in an authentically dialogical way.

Yeats Eliot Review Jul 06 2020

The Anamosa Prison Press May 28 2022

Impirical Foundations of Information and Software Science Aug 19 2021 The purpose of the Second Symposium on Empirical Foundations of Information and Software Science (EFISS) was, in essence, the same as that of the First Symposium in this series, i. e. to explore subjects and methods of scientific inquiry which are of fundamental and common interest to information and software sciences, and to map directions of research that will benefit from the mutual interaction of these two fields. In fact, one of the most important results of the First EFISS Symposium was the conclusion that the commonality of these two sciences is much more than just the commonality of their objects of study, namely, the study of informative and prescriptive properties of texts in all kinds of sign systems (such as natural or artificial languages). Rather, the most challenging problems appear to be in the areas in which both these sciences overlap, such as, for instance, the problem of trade-offs between

informative and prescriptive uses of texts. This problem can be formulated in generic terms as follows: given a certain kind of action or activity which has been prescribed to some agent, i. e. which is required to be implemented or carried out, what kind of information should be provided to the agent, in what form, and how should it be distributed over the contextual structure of the prescriptive text to enable the agent to carry out the action or activity most effectively and efficiently. Merriam-Webster's Advanced Learner's English Dictionary Nov 09 2020 Contains definitions of 100,000 words and phrases for advanced learners of English, and includes pronunciation guides, as well as over 160,000 example sentences.

FBI Law Enforcement Bulletin Sep 19 2021

3D Laser Scanning for Heritage May 04 2020 The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

FEMINISM IN THE NOVELS OF JYOTI ARORA AND NAMITA GOKHALE Jun 24 2019

Monthly Letters of the Committee of the English Anti-Tobacco Society and Anti-Narcotic League Oct 09 2020

A Dictionary of Modern English Usage Dec 11 2020 guide to precise phrases, grammar, and pronunciation can be key; it can even be admired. But beloved? Yet from its first appearance in 1926, Fowler's was just that. Henry Watson Fowler initially aimed his Dictionary of Modern English Usage, as he wrote to his publishers in 1911, at "the half-educated Englishman of literary proclivities who wants to know Can I say so-&-so?" He was of course obsessed with, in Swift's phrase, "proper words in their proper places." But having been a schoolmaster, Fowler knew that liberal doses of style, wit, and caprice would keep his manual off the shelf and in writers' hands. He also felt that description must accompany prescription, and that advocating pedantic "superstitions" and "fetishes" would be to no one's advantage. Adepts will have their favorite inconsequential entries--from burgle to brood, truffle to turgid. Would that we could quote them all, but we can't resist a couple.

The Power of Now Aug 26 2019 To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, *The Power of Now* is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

Substance Abuse Feb 22 2022 The premier text on substance abuse and addictive behaviors is now in its updated and expanded Fourth Edition, with up-to-the-minute insights from more than 150

experts at the front lines of patient management and research. This edition features expanded coverage of the neurobiology of abused substances, new pharmacologic therapies for addictions, and complete information on “club drugs” such as Ecstasy. New sections focus on addiction in children, adolescents, adults, and the elderly and women’s health issues, including pregnancy. The expanded behavioral addictions section now includes hoarding, shopping, and computer/Internet abuse. Includes access to a Companion website that has fully searchable text.

Acomplete Dictionary of the English Language, Both with Regard to Sound and Meaning; , to which is Prefixed a Prosodial Grammar. The 2. Ed. Corr. and Enlarged Nov 21 2021

Pascal: Reasoning and Belief Nov 02 2022 This book is a study of Blaise Pascal's defence of Christian belief in the *Pensées*. Michael Moriarty aims to expound—and in places to criticize—what he argues is a coherent and original apologetic strategy. Setting out the basic philosophical and theological presuppositions of Pascal's project, the present volume draws the distinction between convictions attained by reason and those inspired by God-given faith. It also presents Pascal's view of the contradictions within human nature, between the 'wretchedness' (our inability to live the life of reason, to attain secure and durable happiness) and the 'greatness' (the power of thought, manifested in the very awareness of our wretchedness). His mind-body dualism and his mechanistic conception of non-human animals are discussed. Pascal invokes the biblical story of the Fall and the doctrine of original sin as the only credible explanation of these contradictions. His analysis of human occupations as powered by the twin desire to escape from painful thoughts and to gratify one's vanity is subjected to critical examination, as is his conception of the self and self-love. Pascal argues that just as Christianity propounds the only explanation for the human condition, so it offers the only kind of happiness that would satisfy our deepest longings. He thus reasons that we have an

interest in investigating its truth-claims as rooted in the Bible and in history. The closing chapters of this book discuss Pascal's view of Christian morality and the famous 'wager' argument for opting in favour of Christian belief.

Enabling Technologies for Simulation Science IX Jun 28 2022 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high-quality conferences in the broad-ranging fields of optics and photonics. These books provide prompt access to the latest innovations in research and technology in their respective fields. Proceedings of SPIE are among the most cited references in patent literature.
