**New Systems Theories of World Politics** Jan 14 2021 **New Systems Theories of World Politics** offers a fresh look at contemporary world politics. It uses a number of systems theoretical approaches in order to analyze the structure and dynamics of the international system. While a rich tradition of systems theorizing in International Relations emerged in the 1950s and 1960s, in recent years the study of world politics has tended to bypass developments in systems theory in favor of micro-level theories. Drawing on advances in systems theorizing in both the social and natural sciences, from agent-based modeling to quantum physics, this book explores the utility of reinvigorated systemic thought in helping us to understand the contemporary global condition. The editors argue that the system of world politics can be analyzed in a comprehensive fashion by continuing the pioneering work of theorists like Karl Deutsch.

World Politics in Translation Jul 20 2021 Virtually all pertinent issues that the world faces today – such as nuclear proliferation, climate change, the spread of infectious disease and economic globalization – imply objects that move. However, surprisingly little is known about how the actual objects of world politics are constituted, how they move and how they change while moving. This book addresses these questions through the concept of 'translation' – the simultaneous processes of object constitution, transportation and transformation. Translations occur when specific forms of knowledge about the environment, international human rights norms or water policies consolidate, travel and change. *World Politics in Translation* conceptualizes 'translation' for International Relations by drawing on theoretical insights from Literary Studies, Postcolonial Scholarship and Science and Technology Studies. The individual chapters explore how the concept of translation opens new perspectives on development cooperation, the diffusion of norms and organizational templates, the performance in and of international organizations or the politics of international security governance. This book constitutes an excellent resource for students and scholars in the fields of Politics, International Relations, Social Anthropology, Development Studies and Sociology. Combining empirically grounded case studies with methodological reflection and theoretical innovation, the book provides a powerful and productive introduction to world politics in translation.

**Concepts in World Politics** Sep 29 2019 Recognizing the vital importance of concepts in shaping our understanding of international relations, this ground-breaking new book puts concepts front and centre, systematically unpacking them in a clear, critical and engaging way. With contributions from some of the foremost authorities in the field, *Concepts in World Politics* explores 17 core concepts, from democracy to globalization, sovereignty to revolution, and covers: The multiple meanings of a concept, where these meanings come from, and how they are employed theoretically and practically The consequences of using concepts to frame the world in one way or another The method of concept analysis A challenging and stimulating read, *Concepts in World Politics* is an indispensable guide for all students of international relations looking to develop a more nuanced and sophisticated understanding of world politics.

Climate Change in World Politics Feb 01 2020 John Vogler examines the international politics of climate change, with a focus on the United Nations Framework Convention (UNFCCC). He considers how the international system treats the problem of climate change, analysing the ways in which this has been defined by the international community and the interests and alignments of state governments.

Power in World Politics Nov 23 2021 This book engages the view that students of International Relations need to break with the habit of defining power in terms of military capabilities of states. Featuring contributions from both upcoming and distinguished scholars, including Steven Lukes, Joseph Nye, and Stefano Guzzini, it explores the nature and location of 'power' in international politics through a variety of conceptual lenses. With a particular focus on the phenomenon of 'soft' power and different types of actors in a globalizing world, fifteen chapters assess the meaning of 'power' from the perspectives of realism, constructivism, global governance, and development studies, presenting discussions ranging from conceptual to practical oriented analyses. *Power in World Politics* attempts to broaden theoretical horizons to enrich our understanding of the distribution of power in world politics, thereby also contributing to the discovery and analysis of new political spaces. This is essential reading for all advanced students and scholars of international relations.

**International Civil Society** Feb 12 2021 Since the end of the Cold War, activists and scholars alike have celebrated the phenomenal growth of transnational social movements across the globe. For some, this new eruption of grass-roots political activism on a world scale - from the Rio Earth Summit to the Seattle anti-globalization protests - represents the emergence of a global or transnational civil society. This book provides a critical survey of recent approaches to the study of civil society and international relations, presenting an alternative historical and sociological account of the interaction between these two spheres. It makes a theoretical case for the importance of social movements in world politics arguing that modern social movements emerging out of civil society have been instrumental in shaping the contemporary international system. In this wide-ranging engagement with past and present controversies in international relations, Colas shows how a renewed conception of international civil society can illuminate future possibilities for international social movement activity. This book will be of great interest to students and scholars of international relations, political sociology and social history, as well as those who seek to play a part in global politics.

**Resolve in International Politics** Sep 09 2020 Why do some leaders and segments of the public display remarkable persistence in confrontations in international politics, while others cut and run? The answer given by policymakers, pundits, and political scientists usually relates to issues of resolve. Yet, though we rely on resolve to explain almost every phenomenon in international politics—from prevailing at the bargaining table to winning on the battlefield—we don't understand what it is, how it works, or where it comes from. *Resolve in International Politics* draws on a growing body of research in psychology and behavioral economics to explore the foundations of this important idea. Joshua Kertzer argues that political will is more than just a metaphor or figure of speech: the same traits social scientists and decision-making scholars use to comprehend willpower in our daily lives also shape how we respond to the costs of war and conflict. Combining laboratory and survey experiments with studies of great power military interventions in the postwar era from 1946 to 2003, Kertzer shows how time and risk preferences, honor orientation, and self-control help explain the ways leaders and members of the public define the situations they face and weigh the trade-offs between the costs of fighting and the costs of backing down. Offering a novel in-depth look at how willpower functions in international relations, *Resolve in International Politics* has critical implications for understanding political psychology, public opinion about foreign policy, leaders in military interventions, and international security.

**Non-State Actors in World Politics** Jan 26 2022 The involvement of non-state actors in world politics can hardly be characterized as novel, but intensifying economic and social exchange and the emergence of new modes of international governance have given them much greater visibility and, many would argue, a more central role. *Non-State Actors in World Politics* analyzes a diverse range of economic, social, legal (and illegal), old and new actors, such as the Catholic Church, trade unions, diasporas, religious movements, transnational corporations and organized crime.

**World Politics** Jun 30 2022 Praised for achieving significant breadth and depth of coverage of all the key themes of IR, this introduction is also full of a range of features and techniques – including a wide range of contemporary case studies and reflection boxes - to help students become adept at the subject quickly and easily

**World Politics at the Edge of Chaos** Apr 28 2022 Comprehensive overview of the inroads made by Complexity Thinking approaches and ideas in the study and practice of world politics. Why are policymakers, scholars, and the general public so surprised when the world turns out to be unpredictable? *World Politics at the Edge of Chaos* suggests that the study of international politics needs new forms of knowledge to respond to emerging challenges such as the interconnectedness between local and transnational realities; between markets, migration, and social movements; and between pandemics, a looming energy crisis, and climate change. Asserting that Complexity Thinking (CT) provides a much-needed lens for interpreting these challenges, the contributors offer a parallel assessment of the impact of CT to anthropocentric and non-anthropocentric (post-human) International Relations. Using this perspective, the result should be less surprise when confronting the dynamism of a fragile and unpredictable global life.

**Theology and World Politics** Mar 28 2022 Situated within the wider post-secular turn in politics and international relations, this volume focuses not on religion per se, but rather explicitly on theology. Contributions to this collection highlight the political theological foundations of international theory and world politics, recasting theology and politics as symbiotic discourses with all the risks, promises and open questions this relation may involve. The overarching claim the book makes is that all politics has theology embedded in it, both in the genealogical sense of carrying ineradicable traces of rival theological traditions, and also in the more ontological sense of being enacted by alternative configurations of the theologico-political. The book is unique in bringing together a diverse group of scholars, spanning knowledge areas as varied as IR, political theory, philosophy, theology, and history to investigate the complex interconnections between theology and world politics. It will be of interest to students and scholars of political theory, international relations, intellectual history, and political theology.

*Technology and World Politics* Dec 25 2021 This edited volume provides a convenient entry point to the cutting-edge field of the international politics of technology, in an interesting and informative manner. *Technology and World Politics* introduces its readers to different approaches to technology in global politics

through a survey of emerging fusions of Science and Technology Studies and International Relations. The theoretical approaches to the subject include the Social Construction of Technology, Actor-Network Theory, the Critical Theory of Technology, and New Materialist and Posthumanist approaches. Considering how such theoretical approaches can be used to analyse concrete political issues such as the politics of nuclear weapons, Internet governance, shipping containers, the revolution in military affairs, space technologies, and the geopolitics of the Anthropocene, the volume stresses the socially constructed and inherently political nature of technological objects. Providing the theoretical background to approach the politics of technology in a sophisticated manner alongside a glossary and guide to further reading for newcomers, this volume is a vital resource for both students and scholars focusing on politics and international relations.

***Status in World Politics*** Apr 04 2020 Rising powers such as Brazil, China, India, Russia, and Turkey are increasingly claiming heightened profiles in international politics. Although differing in other respects, rising states have a strong desire for recognition and respect. This pioneering volume on status features contributions that develop propositions on status concerns and illustrate them with case studies and aggregate data analysis. Four cases are examined in depth: the United States (how it accommodates rising powers through hierarchy), Russia (the influence of status concerns on its foreign policy), China (how Beijing signals its status aspirations), and India (which has long sought major power status). The authors analyze status from a variety of theoretical perspectives and tackle questions such as: How do states signal their status claims? How are such signals perceived by the leading states? Will these status concerns lead to conflict, or is peaceful adjustment possible?

***Popular Culture and World Politics*** Oct 30 2019 This edited collection brings together cutting edge insights from a range of key thinkers working in the area of popular culture and world politics (PCWP). Offering a holistic approach to this exciting field of research, it contributes to the establishment of PCWP as a sub-discipline of International Relations. Canvassing issues such as geopolitics, political identities, the War on Terror and political communication - and drawing from sources such as film, videogames, art and music - this collection is an invaluable reader for anyone interested in popular culture and world politics. Contributors include: Jutta Weldes, Christina Rowley, Constance Duncombe, Roland Bleiker, Jason Dittmer, Klaus Dodds, Linda Ahall, Nicholas J. Kiersey, Iver B. Neumann, Michael J. Shapiro, Nick Robinson, Daniel Bos, Saara Sarma, Matt Davies, M.I. Franklin, Robert A. Saunders, Kyle Grayson, and William Clapton."

***Imagining World Politics*** Mar 04 2020 This book offers a non-Western feminist perspective on world politics and international relations. Creative, innovative, and challenging, it seeks completely to transform contemporary Eurocentric and masculinist IR by re-presenting it in non-Western, non-masculinist, and non-academic terms. Drawing on Daoist dialectics, the stories of Sihar and Shenya aim to redress such hegemonic imbalance by completing the IR story. To the yang of power politics, this book offers a yin of fairy-tale. (Both are equally fantastical but to different purposes.) To the yang of binary categories like Self vs Other, West vs Rest, hypermasculinity vs hyperfemininity, Sihar and Shenya show their yin complementarities and complicities, inside and out, top and bottom, center and periphery. And to the yang of intransigent hegemony, Sihar & Shenya explores the yin of emancipation through porous, water-like thought and behavior through venues like aesthetics and emotions. From this basis, we begin to see another world with another kind of politics. Written with students of IR and world politics in mind, this book offers a postcolonial bridge for IR/WP. Following an academic introduction to assist the reader, Ling moves away from traditional scholarship and into three interlocking fables: Book I shows what an alternative world could look and feel like. Book II makes the implications for IR/WP more explicit. It draws on the traditional Chinese notion of the five movements (wu xing) -- fire, metal, earth, wood, and water -- to illustrate iconic elements of IR/WP -- power, wealth, security, love, and knowledge -- and how they could change according to circumstance and context. Epilogue/Introduction: The Return brings the reader back into the Western world and focuses on modern-day PhD student Wanda who is troubled by what she is learning, and searches for a different perspective. Engaging with the substantive problematiqués at the heart of international relations studies, this work is a unique and innovative resource for all students and scholars of international relations and world politics.

World Politics on Screen Aug 28 2019 Few American military figures are more revered than General John J. "Black Jack" Pershing (1860--1948), who is most famous for leading the American Expeditionary Forces in World War I. The only soldier besides George Washington to be promoted to the highest rank in the U.S. Army (General of the Armies), Pershing was a mentor to the generation of generals who led America's forces during the Second World War. Though Pershing published a two-volume memoir, *My Experiences in the World War*, and has been the subject of numerous biographies, few know that he spent many years drafting a memoir of his experiences prior to the First World War. In *My Life Before the World War, 1860--1917*, John T. Greenwood rescues this vital resource from obscurity, making Pershing's valuable insights into key events in history widely available for the first time. Pershing performed frontier duty against the Apaches and Sioux from 1886--1891, fought in Cuba in 1898, served three tours of duty in the Philippines, and was an observer with the Japanese Army in 1905 during the Russo-Japanese War. He also commanded the Mexican Punitive Expedition to capture Pancho Villa in 1916--1917. *My Life Before the World War* provides a rich personal account of events, people, and places as told by an observer at the center of the action. Carefully edited and annotated, this memoir is a significant contribution to our understanding of a legendary American soldier and the historic events in which he participated.

The Dao of World Politics Nov 11 2020 This book draws on Daoist yin/yang dialectics to move world politics from the current stasis of hegemony, hierarchy, and violence to a more balanced engagement with parity, fluidity, and ethics. The author theorizes that we may develop a richer, more representative approach towards sustainable and democratic governance by offering a non-Western alternative to hegemonic debates in IR. The book presents the story of world politics by integrating folk tales and popular culture with policy analysis. It does not exclude current models of liberal internationalism but rather brackets them for another

day, another purpose. The deconstruction of IR as a singular unifying school of thought through the lens of a non-Westphalian analytic shows a unique perspective on the forces that drive and shape world politics. This book suggests new ways to articulate and act so that global politics is more inclusive and less coercive. Only then, the book claims, could IR realize what the dao has always stood for: a world of compassion and care. The Dao of World Politics bridges the humanities and social sciences, and will be of interest to scholars and students of the global/international, as well as policymakers and activists of the local/domestic.

**Sexualities in World Politics** May 06 2020 As LGBTQ claims acquire global relevance, how do sexual politics impact the study of International Relations? This book argues that LGBTQ perspectives are not only an inherent part of world politics but can also influence IR theory-making. LGBTQ politics have simultaneously gained international prominence in the past decade, achieving significant policy change, and provoked cultural resistance and policy pushbacks. Sexuality politics, more so than gender-based theories, arrived late on the theoretical scene in part because sexuality and gender studies initially highlighted post-structuralist thinking, which was hardly accepted in mainstream political science. This book responds to a call for a more empirically motivated but also critical scholarship on this subject. It offers comparative case-studies from regional, cultural and theoretical peripheries to identify ways of rethinking IR. Further, it aims to add to critical theory, broadening the knowledge about previously unrecognized perspectives in an accessible manner. Being aware of preoccupations with the de-queering, disciplining nature of theory establishment in the social sciences, we critically reconsider IR concepts from a particular LGBTQ vantage point and infuse them with queer thinking. Considering the relative dearth of contemporary mainstream IR-theorizing, authors ask what contribution LGBTQ politics can provide for conceiving the political subject, as well as the international structure in which activism is embedded. This book will be of interest to students and scholars of gender politics, cultural studies and international relations theory.

Understanding Global Politics Aug 21 2021 Contemporary international affairs are largely shaped by widely differing thematic issues and actors, such as nation states, international institutions, NGOs and multinational companies. Obtaining a deeper understanding of these multifaceted themes and actors is crucial for developing a genuine understanding of contemporary international affairs. This book provides undergraduate and postgraduate students of global politics and international relations with the necessary knowledge of the forces that shape and dominate our global political, economic and social/cultural environment. The book significantly enhances our understanding of the essentials of contemporary international affairs.

Understanding Global Politics takes a pragmatic approach to international relations, with each chapter being written by an expert in their respective field: Part I provides the historical background that has led to the current state of world affairs. It also provides clear outlines of the major yet often complex theories of international relations. Part II is dedicated to the main actors in global politics. It discusses actors such as the most important nation states, the UN, EU, international organizations, NGOs and multinational companies. Part III considers important contemporary themes and challenges in global politics, including non-state centered challenges. Chapters focus on international terrorism, energy and climate change issues, religious fundamentalism and demographic changes. The comprehensive structure of this book makes it particularly viable to students who wish to pursue careers in international organizations, diplomacy, consultancy, the think tank world and the media.

*Justice and Reconciliation in World Politics* Jun 26 2019 This book examines how justice and reconciliation in world politics should be conceived in response to the injustice and alienation of modern colonialism?

Transforming World Politics Oct 11 2020 This book provides a critical understanding of contemporary world politics by arguing that the neoliberal approach to international relations seduces many of us into investing our lives in projects of power and alienation. These projects offer few options for emancipation; consequently, many feel they have little choice but to retaliate against violence with more violence. The authors of this pioneering work articulate worldism as an alternative approach to world politics. It intertwines non-Western and Western traditions by drawing on Marxist, postcolonial, feminist and critical security

approaches with Greek and Chinese theories of politics, broadly defined. The authors contend that contemporary world politics cannot be understood outside the legacies of these multiple worlds, including axes of power configured by gender, race, class, and nationality, which are themselves linked to earlier histories of colonizations and their contemporary formations. With fiction and poetry as exploratory methods, the authors build on their 'multiple worlds' approach to consider different sites of world politics, arguing that a truly emancipatory understanding of world politics requires more than just a shift in ways of thinking; above all, it requires a shift in ways of being. *Transforming World Politics* will be of vital interest to students and scholars of International Relations, Political Science, Postcolonial Studies, Social Theory, Women's Studies, Asian Studies, European Union and Mediterranean Studies, and Security Studies.

***Critical Methods for the Study of World Politics*** Aug 09 2020 This book develops an approach to both method and the socio-political implications of knowledge production that embraces our embeddedness in the world that we study. It seeks to enact the transformative potentials inherent in this relationship in how it engages readers. It presents a creative survey of some of the newest developments in critical research methods and critical pedagogy that together go beyond the aims of knowledge transfer that often structure our practices. Each contribution takes on a different shape, tone and orientation, and discusses a critical method or approach, teasing out the ways in which it can also work as a transformative practice. While the presentation of different methods is both rigorously practice-based and specific, contributors also offer reflections on the stakes of critical engagement and how it may play an important role in expanding and subverting existing regimes of intelligibility. Contributions variously address the following key questions: What makes your research method important? How can others work with it? How has research through this method and/or the way you ended up deploying it transformed you and/or your practice? How did it matter for thinking about community, (academic) collaboration, and sharing 'knowledge'? This volume makes the case for re-politicizing the importance of research and the transformative potentials of research methods not only in 'accessing' the world as an object of study, but as ways of acting and being in the world. It will be of interest to students and scholars of international relations, critical theory, research methods and politics in general.

***Constitutionalizing World Politics*** Jan 02 2020 Constitutionalization of world politics is emerging as an unintended consequence of international treaty making driven by the logic of democratic power. The analysis will appeal to scholars of International Relations and International Law interested in international cooperation, as well as institutional and constitutional theory and practice.
