Next Extinct Mammal Feb 25 2022 Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.

Accelerating MATLAB with GPU Computing Jan 15 2021 Beyond simulation and algorithm development, many developers increasingly use MATLAB even for product deployment in computationally heavy fields. This often demands that MATLAB codes run faster by leveraging the distributed parallelism of Graphics Processing Units (GPUs). While MATLAB successfully provides high-level functions as a simulation tool for rapid prototyping, the underlying details and knowledge needed for utilizing GPUs make MATLAB users hesitate to step into it. *Accelerating MATLAB with GPUs* offers a primer on bridging this gap. Starting with the basics, setting up MATLAB for CUDA (in Windows, Linux and Mac OS X) and profiling, it then guides users through advanced topics such as CUDA libraries. The authors share their experience developing algorithms using MATLAB, C++ and GPUs for huge datasets, modifying MATLAB codes to better utilize the computational power of GPUs, and integrating them into commercial software products. Throughout the book, they demonstrate many example codes that can be used as templates of C-MEX and CUDA codes for readers' projects. Download example codes from the publisher's website:

Democracy, Revolution, and Monarchism in Early American Literature Aug 02 2022 Paul Downes combines literary criticism and political history in order to explore responses to the rejection of monarchism in the American revolutionary era. Downes' analysis considers the Declaration of Independence, Franklin's autobiography, Crèvecoeur's Letters from an American Farmer and the works of America's first significant literary figures including Charles Brockden Brown, Washington Irving and James Fenimore Cooper. He claims that the post-revolutionary American state and the new democratic citizen inherited some of the complex features of absolute monarchy, even as they were strenuously trying to assert their difference from it. In chapters that consider the revolution's mock execution of George III, the Elizabethan notion of the 'king's two bodies' and the political significance of the secret ballot, Downes points to the traces of monarchical political structures within the practices and discourses of early American democracy. This is an ambitious study of an important theme in early

American culture and society.

Patterns of World History Oct 04 2022 Patterns of World History offers a distinct framework for understanding the global past through the study of origins, interactions, and adaptations. Authors Peter von Sivers, Charles A. Desnoyers, and George Stow - each specialists in their respective fields - examine the full range of human ingenuity over time and space in a comprehensive, even-handed, and critical fashion. The book helps students to see and understand patterns through: ORIGINS - INTERACTIONS - ADAPTATIONS These key features show the O-A-I framework in action: * Seeing Patterns, a list of key questions at the beginning of each chapter, focuses students on the 3-5 over-arching patterns, which are revisited, considered, and synthesized at the end of the chapter in Thinking Through Patterns. * Each chapter includes a Patterns Up Close case study that brings into sharp relief the O-I-A pattern using a specific idea or thing that has developed in human history (and helped, in turn, develop human history), like the innovation of the Chinese writing system or religious syncretism in India. Each case study clearly shows how an innovation originated either in one geographical center or independently in several different centers. It demonstrates how, as people in the centers interacted with their neighbors, the neighbors adapted to - and in many cases were transformed by - the idea, object, or event. Adaptations include the entire spectrum of human responses, ranging from outright rejection to creative borrowing and, at times, forced acceptance.

Death Waits in the Dark Apr 05 2020 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US

Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

[A Short Guide to Risk Appetite](#) Oct 12 2020 How much risk should we take? A Short Guide to Risk Appetite sets out to help all those who need to decide how much risk can be taken in a particular risky and important situation. David Hillson and Ruth Murray-Webster introduce the RARA Model to explain the complementary and central roles of Risk Appetite and Risk Attitude, and along the way they show how other risk-related concepts fit in. Risk thresholds are the external expression of inherent risk appetite, and the challenge is how to set the right thresholds. By progressively deconstructing the RARA Model, the authors show that the essential control step is our ability to choose an appropriate risk attitude. The book contains practical guidance to setting risk thresholds that take proper account of the influences of organisational risk culture and the individual risk preferences of key stakeholders. Alongside this, individuals and organisations need to choose the risk attitude that will optimise their chances of achieving the desired objectives.

[The Fortunes of Wangrin](#) Jan 27 2022 The Fortunes of Wangrin Amadou Hampaté Bâ [note special accents on the "e" in Hampaté and "a" Ba not correctly reproduced here--see ms.] Translated by Aina Pavolini Taylor with an Introduction by F. Abiola Irele Winner of the Grand Prix Littéraire de l'Afrique Noire "I think this is perhaps the best African novel on colonialism and it draws very richly on various modes of oral literature." --Ralph Austen, University of Chicago "It is a wonderful introduction to colonial rule as experienced by Africans, and in particular, to the rule of African middlemen." --Martin A. Klein, University of Toronto "The Fortunes of Wangrin is not only a wonderful novel by one of Africa's most renowned intellectuals, it is also literally filled with information about French colonization and its impact on traditional African societies, African resistance and collaboration to colonization, the impact of French education in Africa, and a host of other subjects of interest." --Francois Manchuelle, New York University Wangrin is a rogue and an operator, hustling both the colonial French and his own people. He is funny, outrageous, corrupt, traditional, and memorable. Bâ's book bridges the chasm between oral and written literature. The stories about Wangrin

are drawn from oral sources, but in the hands of this gifted writer these materials become transformed through the power of artistic imagination and license. *The Fortunes of Wangrin* is a classic in Franchophone African literature. Amadou Hampaté Bâ was a distinguished Malian poet and scholar of African oral tradition and precolonial history. Aina Pavolini Taylor is an independent translator with wide experience of Africa, now living and working in Italy. F. Abiola Irele is a professor in the Department of Black Studies at Ohio State University.

American Appetites Sep 10 2020 Designed to appeal to students of history and foodies alike, *American Appetites*, the first book in the University of Arkansas Press's new Food and Foodways series, brings together compelling firsthand testimony describing the nation's collective eating habits throughout time. Beginning with Native American folktales that document foundational food habits and ending with contemporary discussions about how to obtain adequate, healthful, and ethical food, this volume reveals that the quest for food has always been about more than physical nourishment, demonstrating changing attitudes about issues ranging from patriotism and gender to technology and race. Readers will experience vicariously hunger and satiation, culinary pleasure and gustatory distress from perspectives as varied as those of enslaved Africans, nineteenth-century socialites, battle-weary soldiers, impoverished immigrants, and prominent politicians. Regardless of their status or the peculiarities of their historical moment, the Americans whose stories are captured here reveal that U.S. history cannot be understood apart from an examination of what drives and what feeds the American appetite.
