BSA Dandy 1957-1962 Workshop Manual Feb 01 2020 106 pages, and more than 75 illustrations and charts, size 8.25 x 10.75 inches. This manual is a compilation of three factory publications including the 'How to ride the BSA Dandy' instruction manual, the parts/spares manual and a compilation of specific 'dealer only' service sheets. It should be noted that BSA never published a workshop manual

for the Dandy, however, the combination of these three factory publications provides the most comprehensive maintenance and repair information that was ever made available from the manufacturer. **MANUALS & TECHNICAL PUBLICATIONS: SERVICE SHEETS:** In 1945, after the war had ended, BSA resumed production of their civilian line of motorcycles. However, they continued their pre-war practice of publishing repair, overhaul and technical information in the form of individual 'Service Sheets'. It should be noted that BSA never intended that these service sheets would be distributed to the general public they were 'dealer only' publications. Consequently, these 'Service Sheets' were the only publications available for the maintenance and repair of BSA models that were manufactured through the early 1960's. **INSTRUCTION MANUAL:** BSA published an 'Instruction Manual' titled, 'How to ride the BSA Dandy'. This publication was somewhat more detailed than most typical 'owner's manuals' as it included basic overhaul information in addition to general maintenance and adjustments. However, when used in conjunction with the 'Service Sheets' they are a reasonable substitute for a workshop manual. **PARTS (or) SPARES MANUAL:** The parts manual includes exploded component diagrams which are extremely helpful in the rebuilding or restoration process. **MEET THE PUBLISHER** VelocePress.com has been publishing reprints of motorcycle and automobile manuals since 2003 and our publications have earned excellent reviews worldwide so you can be assured you are purchasing a quality product. We encourage you to exercise caution when purchasing a manual for your motorcycle as many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned', 'used' or even 'refurbished'! In addition, they are often

advertised for the incorrect series and/or model years. With more than 250 titles in print VelocePress is one of the fastest growing specialty automobile and motorcycle publishing companies in the USA. Please visit our website at [www.VelocePress.com](http://www.VelocePress.com) for more information on our company and our books.

**Ducati Factory Workshop Manual** Sep 09 2020 A faithful reproduction of the Factory Workshop Manual originally published by Floyd Clymer in 1967. This fully illustrated manual covers the 160cc, 250cc and 350cc narrow case, Single Cylinder, OHC series of Ducati motorcycles including the 160 Monza Junior, 250 Monza, 250GT, 250 Mark 3, 250 Mach1, 250 Motocross and the 350 Sebring. As expected from a factory publication, this manual includes complete technical data and comprehensive detailed instructions for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Ducati motorcycles. It contains a comprehensive Technical Specification section for every variant, by year, for each model followed by a descriptive section of all major components. Includes detailed repair and rebuild data for the Engine, Clutch, Transmission, Ducati and Marzocchi Forks, Rear Suspension, Wheels, Brakes and more. It also includes comprehensive information on the Electrical and Ignition Equipment plus Wiring Diagrams. There is adequate detailed text and

illustrations to assist in major refurbishing such as an engine rebuild or even a complete mechanical renovation. An essential addition to any Ducati Motor Cycle Enthusiast's library, this book has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. This is a - must have - reference for this series of Ducati motorcycles and we are pleased to be able to offer this reproduction as a service to all Ducati enthusiasts worldwide.

*BSA Sunbeam & Triumph Tigress Scooter 1959-1965 Workshop Manual* Jun 26 2019 184 pages, and more than 120 illustrations and charts, size 8.25x10.75 inches. This manual is a compilation of three

factory publications including the owner's instruction manual, the parts/spares manual and a set of service sheets. These publications cover all three variations of the 175cc two-stroke and the 250cc four-stroke and electric start models manufactured from 1959-1965. Neither BSA nor Triumph ever published a workshop manual for these models, however, the combination of these three publications provides the most comprehensive maintenance and repair information that was ever made available from the manufacturer. **MANUALS & TECHNICAL PUBLICATIONS:** Maintenance, repair and service information was issued under both the BSA and Triumph name. However, as the machines were identical in all aspects, any technical documentation can be applied to either manufacturer without hesitation. **SERVICE SHEETS:** Beginning in December 1959, both BSA and Triumph began publishing repair, overhaul and technical information in the form of individual (dealer only) 'Service Sheets'. It should be noted that it was never intended that these service sheets would be distributed to the general public. However, they were eventually combined into a single publication and released under both the BSA and Triumph names, the contents being identical in either case. **INSTRUCTION MANUAL:** Both BSA and Triumph published an identical 'Instruction Manual' the only difference being the name on the front cover. These publications were somewhat more detailed than typical 'owner's manuals' as they included overhaul information in addition to general maintenance and adjustments. As these instruction manuals were included with each new scooter purchased, there were a number of 'editions' published during the lifetime of the model, however, the contents remained basically unchanged. When combined with the 'Service Sheets' they are a reasonable substitute for a workshop manual. **PARTS (or) SPARES MANUAL:** The parts manuals are also identical and include exploded component diagrams that are extremely helpful in the rebuilding or restoration process. **ADDITIONAL DATA:** There is an addendum to the rear of this

manual that contains a number of communications that were sent from the UK factory to their US distributors. These documents are somewhat rare and they may be of help in assisting in the maintenance of one of these machines. DESIGN & GENERAL SPECIFICATIONS: Designed by Edward Turner (Triumph) and sold under both BSA and Triumph brand names to take advantage of established distribution networks, this badge engineering was one of the last uses of the Sunbeam name. The differences between the BSA Sunbeam and Triumph Tigress were entirely cosmetic—the former in polychromatic green paint, also two-tone red and cream, with a BSA badge; the latter in a shell blue or mimosa and ivory (two-tone) with a Triumph badge. Introduced in late 1959, the scooter was available with a 250 cc four-stroke twin (10hp), or 175cc two-stroke single cylinder engine (7.5hp). Both engines were forced-air-cooled. The two-stroke was a development of the BSA Bantam engine but the four-stroke was a completely new parallel-twin with a gear drive to the gearbox. The contact-breaker fed two separate ignition coils, each of which connected directly to its own spark plug without the need for a distributor. Drive to the rear wheel was by a fully enclosed chain in an oil bath. Both versions had four, foot-operated gears. Some of the 250 twins were fitted with an electric starter and a 12 volt (not 6 volt) electrical system, they were identified as either B2S (Sunbeam) or TW2S (Triumph). The 250 cc four-stroke model was discontinued in 1964 and the 175cc two-stroke model in 1965.
