[The Art of Conscious Conversations](#) Aug 02 2022 Ditch the negative mental habits that derail conversations and destroy projects, and discover a framework for forging authentic, enduring, and productive connections. We live in conversations like fish live in water—we're in them all the time, so we don't think about them much. As a result, we often find ourselves stuck in cyclical patterns of unproductive behaviors. We listen half-heartedly, react emotionally, and respond habitually, like we're on autopilot. This book is a practical guide for thoughtfully reflecting on conversations so we can avoid the common pitfalls that cause our relationships and work to go sideways. Chuck Wisner identifies four universal types of conversations and offers specific advice on maximizing the effectiveness of each: • Storytelling—Investigate the stories we tell ourselves about ourselves and others • Collaborative—Explore the way our stories and other people's stories interact • Creative—See new possibilities and discover unforeseen solutions • Commitment—Make promises we know we can keep These conversations unfold sequentially: our awareness of our and others' stories transforms our ability to listen and collaborate, which opens our thoughts to creative possibilities, guiding us toward mindful agreements. Our conversations—at home, at work, or in public—can be sources of pleasure and stepping-stones toward success, or they can cause pain and lead to failure. Wisner shows how we can form a connection from the very first conversation and keep our discourse positive and productive throughout any endeavor.

**Revelation to Transformation** Feb 02 2020 Most of us have become accustomed to the constant preaching and teaching of guilt and condemnation. This slowly but surely pulls our eyes off of the loveliness of the finished work and onto the unfinished areas of our lives. We know that we are flawed; we don't need someone screaming at us to figure that out. Our problem is not the absence of knowledge that we need help. Rather, it is the utter inability to help ourselves. Calvary was God's intervention in all of our issues. By relieving us of the punishment of sin, He is freeing us from the weight of guilt and the fear of death. The author of Hebrews said that when Jesus died, He did so to "deliver them who through fear of death were all their lifetime subject to bondage" (Hebrews 2:15). Jesus has delivered us from fear of eternal punishment by being punished in our place!

**Ethics as a Weapon of War** Nov 24 2021 What role does ethics play in modern-day warfare? Is it possible for ethics and militarism to exist hand-in-hand? James Eastwood examines the Israeli military and its claim to be 'the most moral army in the world'. This claim has been strongly contested by human rights bodies and international institutions in their analysis of recent military engagements in the West Bank, Gaza and Lebanon. Yet at the same time, many in Israel believe this claim, including the general public, military personnel and politicians. Compiled from extensive research including interviews with soldiers, Eastwood unpacks the ethical pedagogy of the Israeli military, as well as soldier-led activism which voices a moral critique, and argues that the belief in moral warfare doesn't exist separately from the growing violence of Israel's occupation. This book is ideal for those interested in military ethics and Israeli politics, and provides crucial in-depth analysis for students and researchers alike.

The Transforming Power of the Gospel Mar 05 2020 The apostle Paul writes that we are to be transformed, but for many Christians, figuring out how to approach spiritual transformation can be elusive. Best-selling author Jerry Bridges helps us understand that we have available to us the ultimate power source for true spiritual growth: the gospel. In *The Transforming Power of the Gospel*, Bridges guides you through a thorough examination of: What the biblical meaning of grace is and how it applies to your life How Jesus' work in His life and death applies to the believer in justification and adoption Why basic spiritual disciplines are necessary for spiritual growth What role the Holy Spirit plays in both definitive and progressive sanctification

**Military Ethics** Feb 25 2022 What significance does "ethics" have for the men and women serving in the military forces of nations around the world? What core values and moral principles collectively guide the members of this "military profession?" This book explains these essential moral foundations, along with "just war theory," international relations, and international law. The ethical foundations that define the "Profession of Arms" have developed over millennia from the shared moral values, unique role responsibilities, and occasional reflection by individual members the profession on their own practices - eventually coming to serve as the basis for the "Law of Armed Conflict" itself. This book focuses upon the ordinary men and women around the world who wear a military uniform and are committed to the defense of their countries and their fellow citizens. It is about what they do, how they do it, what they think about it, how they behave when carrying out their activities, and how they are expected to behave, both on and off the battlefield (whether in, or out of, uniform) - and what everyone (and not just military personnel themselves) needs to know about this. The book also examines how military personnel are treated and regarded by those whom they have sworn to defend and protect, as well as how they treat and regard one another within their respective services and organizational settings. Finally, the book discusses the transformations in military professionalism occasioned by new developments in armed conflict, ranging counterinsurgency warfare and humanitarian military intervention, to cyber conflict, military robotics, and private military contracting. From China to Russia, author George Lucas effectively sheds light on today's military ethics in existence throughout the world. Race Jan 15 2021 In *Race: A Theological Account*, J. Kameron Carter meditates on the multiple legacies implicated in the production of a racialized world and that still mark how we function in it and think about ourselves. These are the legacies of colonialism and empire, political theories of the state, anthropological theories of the human, and philosophy itself, from the eighteenth-century Enlightenment to the present. Carter's claim is that Christian theology, and the signal transformation it (along with Christianity) underwent, is at the heart of these legacies. In that transformation, Christian anti-Judaism biologized itself so as to racialize itself. As a result, and with the legitimation of Christian theology, Christianity became the cultural property of the West, the religious ground of white supremacy and global hegemony. In short, Christianity became white. The racial imagination is thus a particular kind of theological problem. Not content only to describe this problem, Carter constructs a way forward for Christian theology. Through engagement with figures as disparate in outlook and as varied across the historical landscape as Immanuel Kant, Frederick Douglass, Jarena Lee, Michel Foucault, Cornel West, Albert Raboteau, Charles Long, James Cone, Irenaeus of Lyons, Gregory of Nyssa, and Maximus the Confessor, Carter reorients the whole of Christian theology, bringing it into the twenty-first century. Neither a simple reiteration of Black Theology nor another expression of the new theological orthodoxies, this groundbreaking book will be a major contribution to contemporary Christian theology, with ramifications in other areas of the humanities.

*Utilitarianism and the Ethics of War* Jan 27 2022 This book offers a detailed utilitarian analysis of the ethical issues involved in war. *Utilitarianism and the Ethics of War* addresses the two basic ethical questions posed by war: when, if ever, are we morally justified in waging war, and if recourse to arms is warranted, how are we permitted to fight the wars we wage? In addition, it deals with the challenge that realism and relativism raise for the ethical discussion of war, and with the duties of military personnel and the moral challenges they can face. In tackling these matters, the book covers a wide range of topics—from pacifism to armed humanitarian intervention, from the right of national defense to pre-emptive or preventive war, from civilian immunity to the tenets of just war theory and the moral underpinnings of the rules of war. But, what is distinctive about this book is that it provides a consistent and thorough-going utilitarian or consequentialist treatment of the fundamental normative issues that war occasions. Although it goes against the tide of recent work in the field, a utilitarian approach to the ethics of war illuminates old questions in new ways by showing how a concern for well-being and the consequences of our actions and policies shape the moral constraints to which states and other actors must adhere. This book will be of much interest to students of the ethics of war, just war theory, moral philosophy, war and conflict studies and IR.

**Albie Sachs and Transformation in South Africa** Nov 12 2020 Many critical theorists talk and write about the day after the revolution, but few have actually participated in the constitution of a revolutionary government. Emeritus Justice Albie Sachs was a freedom fighter for most of his life. He then played a major role in the negotiating committee for the new constitution of South Africa, and was subsequently appointed to the new Constitutional Court of South Africa. Therefore, the question of what it means to make the transition from a freedom fighter to a participant in a revolutionary government is not abstract, in Hegel's sense of the word, it is an actual journey that Albie Sachs undertook. The essays in this book raise the complex question of what it actually means to make this transition without selling out to the demands of realism. In addition, the preface written by Emeritus Justice Albie Sachs and his interview with Drucilla Cornell and Karin van Marle, further address key questions about revolution in the twentieth- and twenty-first centuries: from armed struggle to the organization of a nation state committed to ethical transformation in the name of justice. Albie Sachs and transformation in South Africa: from revolutionary activist to constitutional court judge illuminates the theoretical and practical experiences of revolution and its political aftermath. With first-hand accounts alongside academic interrogation, this unique book will intrigue anyone interested in the intersection of Law and Politics.

Keys to First Corinthians Aug 22 2021 Essential reading for students and scholars of First Corinthians, this volume brings together 16 influential journal articles on the Pauline epistle from a leading expert in the field. Professor O'Connor provides postscripts to each article,

engaging with the continuing debates on issues raised.

**Love Your Enemies** Jul 21 2021 The author examines the theological bases of just war theory and pacifism, especially in the light of the concept of God, as that motif illuminates Christian discipleship. Differences between the theory of just war and the practice of pacifism are highlighted in the overview of the history of Christian thought on the subject, and the inclusiveness of the ideal of the kingdom for pacifism is emphasized.

*Poland's Transformation* May 07 2020 Poland has carried out two peaceful revolutions in the span of one generation: first, the self-limiting movement of Solidarity, which undermined the legitimacy of Communism and then a negotiated transfer of power from Communism to free market democracy. Today, while Poland is seen as a success story and is joining political and economic associations in the democratic West, Poles themselves seem downcast. They ask: is social anomie a price worth paying for a successful transformation? In making moral compromises with an outgoing tyranny, can one avoid cynicism and disappointment with democracy? Zbigniew Brzezinski, professor of American Foreign Policy at Johns Hopkins University has called Polish Transformation "a work that provides a comprehensive as well as incisive overview of the extraordinary difficult and historically unprecedented process of transforming an increasingly corrupt and decayed totalitarian system into a modern democracy." John Lenczowski, director of the Institute of World Politics, adds that "this extremely useful volume explains the essential elements of the post-communist political transition in Poland. Its authors convey...the cultural and ideological underpinnings that can be captured only by authorities who have developed over a lifetime that special sixth sense for detecting the elusive and unquantifiable soul of a country." Radek Sikorski, the executive director of the New Atlantic Initiative at the American Enterprise Institute, writes that "we should be grateful to the authors and editors of this thoughtful volume for asking questions which remain relevant for that uncomfortably large part of humanity that still lives under totalitarian or authoritarian regimes." Marek Jan Chodakiewicz holds the Kosciuszko chair in Polish Studies at the Miller Center of Public Affairs at the University of Virginia. He is the author of *After the Holocaust: Polish-Jewish Conflict in the Wake of World War II* and *Between Nazis and Soviets: A Case Study of Occupation Politics in Poland, 1939-1947*. John Radzilowski is author and editor of numerous works ranging from Polish to East European history. Dariusz Tolczyk is associate professor of Slavic Languages at the University of Virginia. He is the author of *See No Evil: Literary Cover-Ups and Discoveries of the Soviet Camp Experience*.

**Conversion as Transformation** Oct 12 2020 The process of human transformation is complex and ongoing. This book presents a framework for understanding human transformation through the insights of Bernard Lonergan. The reader will be introduced to terms such as the turn to the subject, consciousness, subjectivity, and intersubjectivity. It will explore terms such as horizon, feelings, values, self-esteem, sublation, conversion, dialectic, and religious experience. The book explores transformation through the way mentors have authored their own lives, told their own stories, and taken possession of their interiority. Transformation is illustrated through the lives of saints and ordinary men and women who did extraordinary things, such as St. Augustine, Dag Hammarskjold, Vaclav Havel, Franz Jaggerstatter, St. Therese of Lisieux, Friedrich Nietzsche, Katherine Ann Power, and Marie Cardinal. Transformation is also illustrated through the medium of cinema: *Babette's Feast*, *The Mission*, *As It is in Heaven*, *Romero*, *Dead Poets Society*, *Ordinary People*, *The Godfather* trilogy, *Three Color* trilogy, *The Lord of the Rings* trilogy, *Dial M for Murder*, and *Twelve Angry Men*. While the book treats religious, moral, affective, intellectual, and psychic conversion as moments of transformation, it argues that ecological conversion requires all of these so as to meet the most serious moral challenge of our time.

Working closely with agricultural economist and editor Constance L. Falk, Kirschenmann recounts his intellectual and spiritual journey. In a unique blend of personal history, philosophical discourse, spiritual ruminations, and practical advice, Kirschenmann interweaves his insights with discussion of contemporary agrarian topics. This collection serves as an invaluable resource to agrarian scholars and introduces readers to an agricultural pioneer whose work has profoundly influenced modern thinking about food.

**Fulfillment Using Real Conscience** Sep 30 2019 Winner of The National Best Book 2009 Awards (in Health: Psychology/Mental Health category) sponsored by USA Book News. *Fulfillment Using Real Conscience* is a groundbreaking work of insight, inspiration and practical guidance for psychological and spiritual fulfillment. With originality and depth, the author distinguishes between our two inner guides--the real conscience which uses reason and the Golden rule, and the socially programmed "superego" which tends to deviate more or less from conscience. Conscience is our best guide as we make choices in handling our needs like power, pleasure, esteem and meaning. Superego or feelings connected with needs can mislead us and cause numerous problems ranging from abuses, addictions, break ups and break downs and many diseases and disorders to extremism and violence. This book is easy to read and provides a good perspective on fulfilling our needs using conscience and keeping feelings and superego in balance. This unique work is particularly timely to promote peace and well-being in individuals, couples, communities and countries, as we face widespread conflicts, deep crises, and wonderful opportunities for transformation. *Creating Eartheaven in Your Life: Profound Transformation of Your Soul* Dec 14 2020 *Creating Eartheaven in Your Life* is unique and it is innate in all human beings. Humanity's quest for a wholesome peaceful life goes unabated. Our search for our better self that identifies with the reality of the world we live in all too often filled with grief and stress is juxtaposed with faith and hope for change or a miracle. Do we just have faith expecting God will deliver humanity from the ills we have caused? Should we just buckle down and be practical seeking solution with our rational self? What kind of God do we actually know or are we seeking a relationship with an image of God taught to us. What is the divine matrix and does a personal God speak to us? Science stands for one view of creation and faith stands for another? Is there a joining point of the two? Has our species *Homo sapiens* stalled out in evolutionary development? Is the world becoming a village of cooperation and mutual peace seeking? Can we continue the way we have been and survive our own arrogance? What is the future of faith,

religion and spirituality? The author in a comprehensive way takes us on a journey to explore answers to these questions and much more. Eartheaven is a paradigm of integration between the souls development and our biological body and by extension all creation. He delves into scientific reality while preserving in the beginning God created. Creating Eartheaven in Your life is a deep exploratory of the souls life in the experience of hurt and suffering and the potential for there to be personal divine human embodiment and therefore earth peace. Through ten fundamental teaching combining Jesus words of two thousand years ago, an Aramaic understanding, the authors revelatory experience in an apparition of Jesus, his 44 years life experience, psychology and science, your reading and learning experience will be a challenge and liberation of the soul. Profound transformation is needed and this codex offers the leverage needed to shift our life course towards personal awakening and transformation as well as providing a blue print for future generations. Creating Eartheaven in Your Life brings us into universal principles of life, a meeting for humanity without walls. This volume of two, addresses specifically transformation of the soul, heaven unfolding. Volume two addresses transformation of the body representing the earth and thus eartheaven. Granted this book is not an easy read but proves to be a strong mirror reflecting back to us our lives and what we can become fulfilling humanity's evolutionary life potential and perhaps vital to our survival as a people.

**Education for Critical Consciousness** Aug 10 2020 Famous for his advocacy of 'critical pedagogy', Paulo Freire was Latin America's foremost educationalist, a thinker and writer whose work and ideas continue to exert enormous influence in education throughout the world today. Education for Critical Consciousness is the main statement of Freire's revolutionary method of education. It takes the life situation of the learner as its starting point and the raising of consciousness and the overcoming of obstacles as its goals. For Freire, man's striving for his own humanity requires the changing of structures which dehumanize both the oppressor and the oppressed.

*Conscience Economy* May 31 2022 A generation of people around the world, from Boston to Bangkok, from New York to New Delhi, are making everyday choices in ways that defy traditional logic. They are judging where and how their clothes were made, not just how they fit. They are thinking global but buying local. They are spending their money and their time, forming loyalties, casting votes and even enjoying entertainment based increasingly upon their desire to make a positive impact on others and the world around them. This new generation believes they can and must make the world better, and they expect business and government to get with the program. The implications of the Conscience Economy are not "soft." Ignore it, and your consumer or voter base will rebel, using a host of free tools and cheap connectivity to spread their rejection to peers around the world in real time. Leverage it, and Conscience Culture is a wellspring of financial upside. The Conscience Economy is the must-read guide to this unprecedented shift in human motivation and behavior. Author Steven Overman, Chief Marketing Officer for Kodak, provides context, inspiration and some basic tools to help readers reframe how they evolve and grow whatever it is they lead--whether it's a community, a business, a product, or a marketing campaign. From the boardroom to the startup loft, from the State Department to the pulsing marketplaces of the developing world, The Conscience Economy will help international leaders, influencers, investors and decision-makers to manage, innovate and thrive in a new world where "doing good" matters as much as "doing well."

Transforming the Soul Oct 24 2021 9 lectures, Berlin, 9 lectures, Berlin, January-May 1910 (CW 59) A previous edition of this work: *Metamorphoses of the Soul: Paths of Experience*, vol. 2. In a refreshingly practical series of lectures, Rudolf Steiner speaks about the nature of the human soul and how it can be transformed and lifted to higher consciousness. He considers the spiritual significance of various expressions of human nature--laughing and weeping, sickness and health, error and mental disorder, positivity and negativity, and conscience. Steiner also discusses prayer, mysticism, the purpose of art, and the significance of language. Throughout these talks, he refers to many key historical figures, including Zarathustra, Socrates, Plato, Homer, Wagner, Goethe, Hegel, and Angelus Silesius. These inspiring lectures form the conclusion to *Transforming the Soul*, vol. 1, but can also be read independently. This volume is a translation of *Metamorphosen des Seelenlebens--Pfade der Seelenerlebnisse: Zweiter Teil* (GA 59).

**Nietzsche, Genealogy, Morality** Aug 29 2019 Nietzsche's *On the Genealogy of Morals* has become a prominent text of recent Western philosophy. An influence on psychoanalysis, antihistoricism, and poststructuralism and an abiding challenge to ethical theory, the philosopher's book addressed many of the major philosophical problems and possibilities of modernity. In this collection of essays focusing on Nietzsche's book, twenty-five philosophers offer discussions of the book's central themes and concepts. They explore such notions as resentment, asceticism, "slave" and "master" moralities, and what Nietzsche calls "genealogy" and its relation to other forms of inquiry in his work.

**Nietzsche's Conscience** Jun 07 2020 Aaron Ridley explores Nietzsche's mature ethical thought as expressed in his masterpiece, arranging his book thematically around the six characters who loom largest in that work--slave, priest, philosopher, artist, scientist, and noble.

**Transforming Parish Communications** Apr 05 2020 "Are we still a Church capable of warming hearts? A Church capable of leading people back to Jerusalem? Of bringing them home?" - Pope Francis, Meeting with the Bishops of Brazil, 28 July 2013. Pope Francis, like his predecessors Benedict XVI and John Paul II, is calling for Catholics to embrace the new evangelization. But there has been ongoing confusion about who is responsible, what it really means and what it looks like in practical application. How can we respond to the Holy Father's call, creating evangelization opportunities that help bring people back to the Church? By transforming Catholics into digital missionaries - ready and able to take the joy and warmth of the Gospel online via social media to infrequent, inactive, or ex-Catholics around the corner or across the globe. Consider this: 1. Nearly every "lost" Catholic in the U.S. is most likely connected with at least one engaged Catholic - or is one "retweet" or "like" away from them 2. On the whole, Catholics have not been taught to see social media as a way to live out their faith 3. Motivating parishes to put a priority on evangelization has been a challenge 4. Catholics are more likely to be comfortable as digital missionaries than to participate in other forms of evangelization 5. Parishes can offer "digital missionary training" to parishioners - who would welcome it! In *Transforming Parish Communications: Growing the Church Through New Media*, you'll discover: How to embrace the Church's vision of evangelization in new media How entire parishes can become hubs of digital evangelization - and how to overcome obstacles Specific strategies for implementation How to create a consistent digital identity online Best practices for parish websites The nuts and bolts of Facebook, Twitter, email, blogging and more Consider this book your entry into an important - and urgent - call to each of us as Catholics. To bring the warmth of the Gospel to the "lost" and bring them back to the Church. Visit the companion site

**Ethics and Military Strategy in the 21st Century** Oct 04 2022 This book examines the importance of "military ethics" in the formulation and conduct of contemporary military strategy. Clausewitz's original analysis of war relegated ethics to the side-lines in favor of political realism, interpreting the proper use of military power solely to further the political goals of the state, whatever those may be. This book demonstrates how such single-minded focus no longer suffices to secure the interest of states, for whom the nature of warfare has evolved to favor strategies that hold combatants themselves to the highest moral and professional standards in their conduct of hostilities. Waging war has thus been transformed in a manner that moves beyond Clausewitz's original conception, rendering political success wholly dependent upon the cultivation and exercise of discerning moral judgment by strategists and combatants in the field. This book utilizes a number of perspectives and case studies to demonstrate how ethics now plays a central role in strategy in modern armed conflict. This book will be of much interest to students of just war, ethics, military strategy, and international relations.

*Conscience in Recovery from Alcohol Addiction* May 19 2021 Academic research in alcohol addiction presents diverse results and subject inadequacies. This study identifies conscience and its influence through spirituality on successful recovery as promoting unity and adequacy in the field. The purpose of the study is to analyze the relationship between conscience, spirituality, and recovery from alcohol addiction. This threefold framework underlines the conceptual importance of cognition, affect, behavior, spirituality, and character in addiction studies. Narrative analysis (NA) is employed for designing the present research. It is utilized for collection, examination, and formulation of the results derived from the participants' stories. Semi-structured interviews are used within the NA framework to provide the data from the twelve participants. The latter are selected as a homogeneous group based on characteristics of their addiction, spirituality, and recovery. The analysis of narratives defines conscience with its cognitive, emotive, and conative elements as related to spirituality. The conscience's nature and functioning undergo deterioration during addiction and complete rejuvenation through participants' spiritual transformation of a transcendent divine experience. Spiritually empowered conscience supports progressive recovery from alcohol addiction. The conscientious approach to self, life, and others is shaped by virtue and spiritual commitment.

**Super Soldiers** Jun 19 2021 The Spartan City State produced what is probably one of the most iconic and ruthless military forces in recorded history. They believed that military training and education began at birth. Post-World War II saw a shift to army tanks, fighter jets and missiles that would go on to fight the next huge battle in Northern Europe. Today, with the advent of unmanned systems, our hopes are attached to the idea that we can fight our battles with soldiers pressing buttons in distant command centres. However, soldiers must now be highly trained, super strong and have the intelligence and mental capacity to handle the highly complex and dynamic military operating environment. It is only now as we progress into the twenty-first century that we are getting closer to realising the Spartan ideal and creating a soldier that can endure more than ever before. This book provides the first comprehensive and unifying analysis of the moral, legal and social questions concerning military human enhancement, with a view toward developing guidance and policy that may influence real-world decision making.

**Iron Butterflies** Jul 29 2019 This inspiring and compelling narrative weaves together stories of sixty successful women from all walks of life and throughout the world. The author spent several years in eight countries interviewing dynamic female role models: businesswomen, CEOs, a Congresswoman, a governor, an ex-Prime Minister, a Pulitzer Prize finalist, a Nobel Peace Prize laureate, a winemaker, artists, doctors, nurses, and many others. The author calls these women "Iron Butterflies" because they meld a will of iron with the gentle, nurturing touch of a butterfly. With disarming candor, these women talk about their struggles, their fallibilities, and their strengths in the journey to the top of their professions. Forging their leadership from an amalgam of masculine and feminine skills, all of these Iron Butterflies have transformed themselves and in doing so they are contributing to a larger social transformation. A key to this personal and social transformation rests in their ability to address vulnerability in themselves and those around them, and transform it into a crucible of

healing, growth, and innovation. Knowing how to deal with vulnerability, in ourselves and with others, evokes feminine skills and values and is a key to the societal change so many are seeking. Critiquing the command-and-control style of leadership, derived from the gladiator concept of male invulnerability, the author convincingly demonstrates how traditional feminine skills and values—such as inclusion, empathy, a holistic perspective, relational skills, and emotional strength—can be applied to empower more people than ever before. Like the sixty Iron Butterflies profiled, leaders in the 21st century will paradoxically embrace vulnerability and durability, creating better working and living relationships for us all.

**Empowering Our Military Conscience** Nov 05 2022 Responding to increasing global anxiety over the ethics education of military personnel, this volume illustrates the depth, rigour and critical acuity of Professional Military Ethics Education (PMEE) with contributions by distinguished ethical theorists. It refreshes our thinking about the axioms of just war orthodoxy, the intellectual and political history of just war theorizing, and the justice of recent military doctrines and ventures. The volume also explores a neglected moral dimension of warfare, *jus ante bellum* (the ethics of pre-war practices) - particularly *jus in disciplina bellica* (the ethics of educating for warfare). Using metaphor to exemplify the professionalization of the military, the book exposes ambivalences within military professionals' concepts of their professional responsibilities, analyzes issues of self-respect posed by service in an unjust cause, and surveys the deep conflicts inherent in PMEE. While primarily focused on US military academies, the volume will resonate with those responsible for education in military academies across the globe.

**Routledge Handbook of Military Ethics** Sep 03 2022 The Routledge Handbook of Military Ethics is a comprehensive reference work that addresses concerns held in common by the military services of many nations. With reference to the responsibilities of professional orientation and education, as well as the challenges posed by recent technological developments, this handbook examines the difficulties underpinning the fundamental framework of military service. **Ethics Beyond War's End** Mar 29 2022 The wars in Afghanistan and Iraq have focused new attention on a perennial problem: how to end wars well. What ethical considerations should guide war's settlement and its aftermath? In cases of protracted conflicts, recurring war, failed or failing states, or genocide and war crimes, is there a framework for establishing an enduring peace that is pragmatic and moral? *Ethics Beyond War's End* provides answers to these questions from the just war tradition. Just war thinking engages the difficult decisions of going to war and how war is fought. But from this point forward just war theory must also take into account what happens after war ends, and the critical issues that follow: establishing an enduring order, employing political forms of justice, and cultivating collective forms of conciliation. Top thinkers in the field—including Michael Walzer, Jean Bethke Elshtain, James Turner Johnson, and Brian Orend—offer powerful contributions to our understanding of the vital issues associated with late- and post conflict in tough, real-world scenarios that range from the US Civil War to contemporary quagmires in Afghanistan, the Middle East, and the Congo.

**Modern Just War Theory** Jul 01 2022 Contributions to Illuminations: A Scarecrow Press Series of Guides to Research in Religion provide students and scholars, lay readers and clergy, with a road map to research in key areas of religious study. All commonly constructed with introductions to the topic and reviews of key thinkers, concepts, and events, each volume includes surveys of the primary and secondary sources, with critical evaluations of their places in the canon of thought and research on the topic. Focusing primarily on the knowledge required by today's students and scholars, each guide is a must-have for any student of religion. The twentieth century saw an explosion of wars and an accompanying explosion of literature on the morality of war. Thinking among Christian clerics and scholars on the idea of "just war" shifted with developments on the battlefield. Alternatives to just war theory, such as pacifism and realism, found new proponents in the published work of the neo-Anabaptists and Niebhurians. Meanwhile, proponents of Christian just war theory had to address challenges from competing ideologies as well as those presented by the changing nature of warfare. *Modern Just War Theory: A Guide to Research*, by scholar and librarian Michael Farrell, serves as a manual for students and scholars studying Christian just war theory, helping them navigate the wealth of just war literature produced in the twentieth and twenty-first centuries. Farrell's guide provides an introduction to the major developments of just war theory in the twentieth century, including sections on how to research just war theory, an overview of some of the most important theorists and developments of the twentieth century, and discussions of key search terms and related topics. Farrell then surveys and evaluates key primary and secondary sources for researchers on just war theory, as well as related sources on Christian realism and the responses of just war theorists to proponents of pacifism and secular just war theories. *Modern Just War Theory* will appeal to students and scholars of theology, military history, international law, and Christian ethics

The Structural Transformation of the Public Sphere Feb 13 2021 This is Jürgen Habermas's most concrete historical-sociological book and one of the key contributions to political thought in the postwar period. It will be a revelation to those who have known Habermas only through his theoretical writing to find his later interests in problems of legitimation and communication foreshadowed in this lucid study of the origins, nature, and evolution of public opinion in democratic societies.

*Armed Drones and the Ethics of War* Dec 26 2021 This book assesses the ethical implications of using armed unmanned aerial vehicles ('hunter-killer drones') in contemporary conflicts. The American way of war is trending away from the heroic and towards the post-heroic, driven by a political preference for air-powered management of strategic risks and the reduction of physical risk to US personnel. The recent use of drones in the War on Terror has demonstrated the power of this technology to transcend time and space, but there has been relatively little debate in the United States and elsewhere over the embrace of what might be regarded as politically desirable and yet morally worrisome: risk-free killing. Arguably, the absence of a relationship of mutual risk between putative combatants poses a fundamental challenge to the status of war as something morally distinguishable from other forms of violence, and it also undermines the professional virtue of the warrior as a courageous risk-taker. This book considers the use of armed drones in the light of ethical principles that are intended to guard against unjust increases in the incidence and lethality of armed conflict. The evidence and arguments presented indicate that, in some respects, the use of armed drones is to be welcomed as an ethically superior mode of warfare. Over time, however, their continued and increased use is likely to generate more challenges than solutions, and perhaps do more harm than good. This book will be of much interest to students of the ethics of war, airpower, counter-terrorism, strategic studies and security studies in general.
