Contracts Mar 17 2021 This concise paperback, which will be a valuable supplementary text to any traditional contracts casebook, combines cases and actual contracts to bring a real-world practical perspective to the first-year contracts classroom. Contracts: A Transactional Approach fills the long-felt need by professors, students, and practitioners for a teaching approach to contracts that focuses on practical and transactional skills. and Contracts: A Transactional Approach introduces business contracts and transactions to the first-year contracts class in a unique fashion: Actually executed agreements between sophisticated parties give students exposure to the sort of agreements they will encounter in practice as either a litigator or a transactional attorney. Agreements are lightly edited and are presented as whole documents unbroken by discussion to force the student to read and analyze contracts in their entirety. Focus points and, where appropriate, practitioner comments before each agreement help focus the student's attention on important concepts. The authors begin with the simplest agreement and iteratively build on the same lessons. The discussion is tailored to basic provisions and their interaction with contract law, enabling students to build familiarity with once seemingly foreign contractual provisions and concepts. Lessons focus on the building block provisions (e.g., recitals, representations, warranties, indemnities, limitations of liability, restrictive covenants, liquidated damages) typically found in sophisticated contracts, including the judicial treatment of those provisions. Practitioner comments from experts in the field provide insight and advice on relevant topics to give a real world and practical perspective and to drive home the relevance of these concepts to students. This book teaches students how to read and understand contracts (and to

anticipate how judges may read and understand contracts) so that the student can better draft contracts. Drafting tips are sprinkled throughout the book.

Network and Parallel Computing Mar 05 2020 This book constitutes the proceedings of the 11th IFIP WG 10.3 International Conference on Network and Parallel Computing, NPC 2014, held in Ilan, Taiwan, in September 2014. The 42 full papers and 24 poster papers presented were carefully reviewed and selected from 196 submissions. A General History and Collection of Voyages and Travels (Vol. 1-18) Dec 14 2020 Prepare yourself for discoveries and new adventures with this incredible book about the true origin of wanderlust. This edition forms a complete history of the earliest start and progress of navigation, discovery, and commerce, by sea and land, from the earliest ages to the early 19th century. First part of the work covers voyages and travels of discovery in the middle ages; from the era of Alfred, King of England, in the ninth century to that of Don Henry of Portugal at the commencement of the fourteenth century. Second part deals with general voyages and travels chiefly of discovery; from the era of Don Henry, in 1412, to that of George III. in 1760. The rest of the work has some particular voyages and travels arranged in systematic order, Geographical and Chronological, and studies voyages during the era of George III conducted upon scientific principles, by which the Geography of the globe has been nearly perfected.
