Breaking with Tradition Oct 24 2021 In Breaking With Tradition: The Shift to Competency-Based Learning in PLCs at Work, authors Brian M. Stack and Jonathan G. Vander Els assert that K-12 education has long concentrated too much on system-centered, not learning-centered, approaches to education. As a result, society has lost focus on the true purpose of schooling: learning for all. Stack and Vander Els present K-12 administrators, school leaders, and teacher leaders with a new model of learning, which replaces traditional, ineffective school systems with a competency-based model that sets learning at the center of schooling and supports teachers to foster an environment that is both personalized and student centered. Using this model to modernize curricular, instructional, and assessment frameworks, educators can improve their students' engagement in and ownership of learning, leading to greater college and career readiness.

[Sound Differentiation for Beginning String Orchestra](#) Feb 02 2020 Sound Differentiation is a motivational, time-saving supplemental resource that provides differentiated parts for 15 well-known tunes--perfect for a variety of teaching situations, including odd or incomplete instrumentation, or when working with a mix of ability levels. The arrangements in this collection are ready for use in an adaptable format with identical parts for all instruments. The featured parts are tune, bass line, harmony, and variation, and each one can be assigned to your choice of soloists, instrument sections, or difficulty-leveled groupings of students of both like-instrumentation or mixed-instrumentation. The difficulty of each piece progresses throughout the book. Here are just some of the ways to differentiate with Sound Differentiation: * Group students into 3 categories based on skill level and assign level-appropriate parts. * Customize each arrangement by choosing the order in which students play each line of the song. * Teachers may assign a new line order using the blank Teacher Order column.

Teacher, Guide, Companion Apr 17 2021 Drawing from the personal experiences of a seasoned pastor, a team of modern liberal scholars, and the gospel accounts of the life of Jesus of Nazareth, Teacher, Guide, Companion challenges readers to reexamine their own relationship with Jesus Christ and its significance in the 21st century. Integrating both secular and religious source materials, Wikstrom demonstrates how a close examination of historical findings and the Gospels can lead to a renewed faith in Jesus Christ. The field of Jesus studies, which is dominated by academics, will benefit from this analysis by a working minister.

The Inner Tradition of Yoga Sep 22 2021 A wise, accessible guide that makes the spiritual and ethical teachings of the yogic tradition immediately relatable to our practice on the mat and in our everyday relationships and activities. There is no daily practice without some formal training; and there is no deep spiritual training without the mess of relational life. The two are one, says Michael Stone. At the root of yoga practice there is a vast and intriguing philosophy that teaches the ethics of nonviolence, patience, honesty, and respect. Innovative teacher Michael Stone draws from numerous disciplines including Buddhism and psychotherapy to provide an in-depth, completely clear explanation of yogic philosophy, along with teachings on how to bring our understanding of yoga theory to deeper levels through our practice on the mat and through our relationships with others. Yoga, says Stone, is a practice that helps us be more present with the actual, fluid life we are living right now and there is no yoga without the conditions of your life. This book describes how to work with those conditions and how to fully appreciate yoga as a practice of being intimate with moment-to-moment reality.

Buddhism Mar 17 2021 Now in Paperback! Explore with the Dalai Lama the common ground underlying the diverse traditions of Buddhism. Buddhism is practiced by hundreds of millions of people worldwide, from Tibetan caves to Tokyo temples to redwood retreats. To an outside viewer, it might be hard to see what they all have in common. In Buddhism, His Holiness the Dalai Lama and American Buddhist nun Thubten Chodron map out with clarity the convergences and the divergences between the two major strains of Buddhism: the Sanskrit traditions of Tibet and East Asia and the Pali traditions of Sri Lanka and Southeast Asia. Especially deep consideration is given to the foundational Indian traditions and their respective treatment of such central tenets as the four noble truths the practice of meditation the meaning of nirvana enlightenment. The authors seek harmony and greater understanding among Buddhist traditions worldwide, illuminating the rich benefits of respectful dialogue and the many ways that Buddhists of all stripes share a common heritage and common goals.

Friendly Chemistry - Teacher Edition Volume 1 Feb 13 2021 Friendly Chemistry is a truly unique approach to teaching introductory chemistry. Used by home schoolers and charter, public and private school students worldwide for over ten years, Friendly Chemistry presents what is often considered an intimidating subject as a genuinely fun, enjoyable experience. Whether you're a high-school aged student needing a lab science course or a "non-traditional" student looking for a refresher course to help you prepare for an upcoming entrance exam, Friendly Chemistry can help you accomplish your goal in a "painless" way! If you do have aspirations of a future in a science field, Friendly Chemistry can give you the solid foundation you need to succeed in subsequent courses. Friendly Chemistry was written using simple language and a host of analogies to make learning (and teaching!) chemistry easy. The chemistry concepts presented in Friendly Chemistry are NOT watered-down. The concepts are just explained in ways that are readily understood by most learners. Coupled with these explanations is a host of teaching aids, labs and games which makes the learning concrete and multi-sensory. Students find the course fun and painless. Parents often comment, "I wish I had had this when I was taking chemistry. Now it all makes so much sense!" Friendly Chemistry covers the same topics taught in traditional high school chemistry courses. The course begins with an introduction to atomic theory followed by discussion of why the elements are arranged the way they are in the periodic table. Quantum mechanics comes next using the acclaimed "Doo-wop" Board as a teaching aid. Next comes a discussion of how atoms become charged (ionization), followed by an explanation of how charged atoms make compounds. The mole is introduced next, followed by a discussion of chemical reactions. Stoichiometry (predicting amounts of product produced from a reaction) is treated next followed by a discussion of solutions (molarity). The course is wrapped up with a discussion of the ideal gas laws. Please note that this is Volume 1 of the Teacher's Edition. Volume 2 of the Teacher's Edition, the Student Edition and the Manipulative Set must be purchased separately to have all necessary materials to complete this course. More information regarding Friendly Chemistry including answers to many frequently asked questions may be found at www.friendlychemistry.com.

Rhetorical Traditions and the Teaching of Writing Jan 15 2021 The argument of this book is that the earliest tradition of Western rhetoric, the classical perspective of Aristotle and Cicero, continues to have the greatest impact on writing instruction--albeit an unconscious impact. This occurs despite the fact that modern rhetoric no longer accepts either the views of mind, language, and world underlying ancient theory or the concepts about discourse, knowledge, and communication presented in that theory. As a result, teachers are depending on ideas as outmoded as they are unreflectively accepted. Knoblauch and Brannon maintain that the two traditions are fundamentally incompatible in their assumptions and concepts, so that writing teachers must make choices between them if their teaching is to be purposeful and consistent. They suggest that the modern tradition offers a richer basis for instruction, and they show what teaching from that perspective looks like and how it differs from traditional teaching.
