Brand Choice and Loyalty Sep 02 2022 By analyzing a large car registration dataset, Beat Meier shows various aspects of consumer behavior in the context of durable goods. He thereby isolates various influences on purchase decisions, e.g. the brand owned before, the price, and demographic variables. Furthermore, he investigates the short-term effects of tax incentives and reputation shocks on brand choice and brand loyalty. The dataset used is very unique and allows a longitudinal examination of the cars owned by a person. This permits to gain insights on consumer behavior of durable goods that are relatively expensive and bought infrequently.

Studying in China Dec 25 2021 "China is changing faster than any other nation on earth today. Written by a Chinese language teacher and a travel professional who works with students in China all the time, Studying in China is an invaluable resource..." —Chinese Language Teachers Association (CLTA) Newsletter A visit to China can change your life. Would you like to study in China, but are not sure what you will find there? A trip to China to live, work or study promises an amazing, life-changing experience in the most historically and culturally fascinating nation on earth. Find all the information you need for your educational experience abroad in Studying in China. China is changing faster than any other nation on earth today. Written by a travel professional who works with students in China all the time, Studying in China is an

invaluable resource that tells you: What to pack that you won't find over there How to arrive at your destination and settle in safely How to make your Chinese instructors happy How your day-to-day experiences will unfold once you are there How to get the most from a limited stay Author Patrick McAloon is a co-founder of SinoConnect, a firm that connects students of all ages with educational opportunities in China and the United States. He has been helping students prepare to study in China for 15 years. Having conducted hundreds of study abroad seminars, McAloon is uniquely qualified to supply students going to China with the latest up-to-date information on how to study abroad. Ready yourself for this experience can be daunting, and Studying in China makes it easy from start to finish. Prepare to make new friends in your classes and while traveling around China, but first learn how to avoid common pitfalls and mistakes. Being an international student in China can be a life-changing experience. Don't take our word for it. Read this book and go study in China!

Motorcycle Maintenance Log Book Mar 16 2021 This is a Motorcycle Maintenance Log Book for anyone that wants to keep track of all the maintenance work and repairs that's done on their pride and joy amongst many other things. This book is perfect for anyone that owns a Motorcycle so you can keep track of any work that has been done and any maintenance that needs to be completed. Whether you own a motorcycle, motorbike, chopper, moped, dirt bike, off-road bike, trail bike or scooter, it will also help if you decide to sell your bike as you will have a record of all the work that has been carried out with dates and costs. This maintenance record book would make the perfect gift for any motorcycle enthusiast that wants to keep their pride and joy in tip-top condition. This Motorcycle Maintenance Log Book has been designed to be as helpful as possible by providing guidance and space to include the following information: Inside the front cover is space for owner and bike details There is a page dedicated to items that have a serial number and their service intervals Space to record all the Spare Parts, part numbers, places to buy and costs that are needed on your individual ride. The main part of the book has

been designed to list the Maintenance and Repair work that's needed (with space to record 500 jobs over 25 double pages). This allows you to note down a job that needs doing or an issue that needs fixing as soon as you spot it and then go back to when you have the time to complete it. Keep track of the date the job was spotted and recorded, a description of the issue, if it was a repair or maintenance item, when it was completed, who did it and space to record any relevant comments ie Temporary repair done, book in yard to fix / replace item or price of parts etc - whatever will be helpful to you! Keep a record of all the jobs that need doing when your bike is next scheduled for a visit to the garage so you can start getting and recording quotes for the work that needs doing. Space for comments and when the work was completed also Fuel log pages to keep track of fuel usage, cost and engine hours An Upgrades wish list (so you know what to put on your Christmas List!) Useful Contacts Drawing Space to draw diagrams Notes Pages The book is 8 inches by 10 inches, paperback with a glossy cover and good quality paper. See what other books we have available for sale by visiting our Amazon Author Page: <https://www.amazon.co.uk/Red-Panda-Publishing/e/B076HQ2LKM>

Scooter Sharing System Apr 28 2022 What Is Scooter Sharing System A scooter-sharing system is a kind of shared transportation that makes electric motorized scooters accessible for hire on a short-term basis. Users may borrow a scooter for as little as an hour. E-scooters are often "dockless," which means that they do not have a permanent residence and must be returned to and picked up from various points within the service area. How You Will Benefit (I) Insights, and validations about the following topics: Chapter 1: Scooter-sharing system Chapter 2: Bicycle-sharing system Chapter 3: Transportation in the San Francisco Bay Area Chapter 4: Motorized scooter Chapter 5: Shared transport Chapter 6: Last mile (transportation) Chapter 7: Bay Wheels Chapter 8: Bolt (company) Chapter 9: Baltimore Bike Share Chapter 10: Lime (transportation company) Chapter 11: Spin (company) Chapter 12: Jump (transportation company) Chapter 13: Euwyn Poon Chapter 14: Scoot Networks Chapter 15:

Bird (transportation company) Chapter 16: Gotcha (company) Chapter 17: Micromobility Chapter 18: Bounce Scooter Share Chapter 19: Helbiz Chapter 20: Yulu (transportation company) Chapter 21: Dott (transportation company) (II) Answering the public top questions about scooter sharing system. (III) Real world examples for the usage of scooter sharing system in many fields. (IV) 17 appendices to explain, briefly, 266 emerging technologies in each industry to have 360-degree full understanding of scooter sharing system' technologies. Who This Book Is For Professionals, undergraduate and graduate students, enthusiasts, hobbyists, and those who want to go beyond basic knowledge or information for any kind of scooter sharing system.

Examining the Socio-Technical Impact of Smart Cities Nov 23 2021 Smart city development and governance is a technological issue and a complex mechanism of the political understanding of technology, environmental interest, and urban interactions in terms of both economic gains and other public values. A smart city is defined by the technology it possesses and how it integrates and uses that technology to improve operational efficiency, propel citizen engagement, and justify inward migration. Understanding the principles and policies at work creates a full understanding of smart cities. Examining the Socio-Technical Impact of Smart Cities is an essential publication that enhances our theoretical understanding of the socio-technical impact of smart cities by promoting the conceptual interactions between social and governmental structures (people, task, structure) with new technologies. Highlighting a wide range of topics including community inclusion, cultural innovation, and public safety, this book is ideally designed for urban planners, entrepreneurs, engineers, government officials, policymakers, academicians, researchers, and students.

The Collaborative Economy in Action: European Perspectives Mar 04 2020 The book titled The Collaborative Economy in Action: European Perspectives is one of the important outcomes of the COST Action CA16121, From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy

(short name: Sharing and Caring; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action Sharing and Caring is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukasiewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Piora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In

2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

Transportation, Land Use, and Environmental Planning Dec 01 2019 *Transportation, Land Use, and Environmental Planning* examines the practices and policies linking transportation, land use and environmental planning needed to achieve a healthy environment, thriving economy, and more equitable and inclusive

society. It assesses best practices for improving the performance of city and regional transportation systems, looking at such issues as public transit and non-motorized travel investments, mixed use and higher density urban development, radically transformed vehicles, and transportation systems. The book lays out the growing need for greater integration of transportation, land use, and environmental planning, looking closely at changing demographic needs, public health concerns, housing affordability, equity, and livability. In addition, strategies for achieving these desired outcomes are presented, including urban design and land use planning, regional and corridor-level transit plans, bike and pedestrian improvements, demand management strategies, and emerging technologies and services. The final part of the book examines implementation challenges, considering lessons from the US and around the globe at both local and regional levels. Introduces never-before-published research Offers best practices for transit, cycling, urban design and housing provision Assesses emerging developments, such as smart cities, new vehicle technologies, automated highways and transportation sharing Examines the institutional and political dimensions of sustainability planning at the urban and regional levels Utilizes case studies from around the world that show alternative ways forward

HCI in Mobility, Transport, and Automotive Systems Oct 03 2022 This book constitutes the refereed proceedings of the 4th International Conference on HCI in Mobility, Transport, and Automotive Systems, MobiTAS 2022, held as part of the 23rd International Conference, HCI International 2022, which was held virtually in June/July 2022. The total of 1271 papers and 275 posters included in the HCII 2022 proceedings was carefully reviewed and selected from 5487 submissions. The MobiTAS 2022 proceedings were organized in the following topical sections: Designing Interactions in the Mobility, Transport, and Automotive Context; Human-Centered Design of Automotive Systems; Driver Information and Assistance Systems; Studies on Automated Driving; and Micro-mobility and Urban Mobility.

New to Improve - The Mutual Influence between New Products and Societal Change

Processes Apr 16 2021

The Self-Sufficient Home Sep 21 2021 How to cut heating and cooling costs, utilize solar energy, construct nonflush toilets and solar showers, collect rainwater, and apply permaculture techniques. Hundreds of photographs and diagrams illustrate ways to use natural resources and embrace self-reliance. Sustainable living advice from self-reliance expert Christopher Nyerges, editor of *Wilderness Way* magazine and author of *How to Survive Anywhere*.

Iconic Designs Oct 23 2021 *Iconic Designs* is a beautifully designed and illustrated guide to fifty classic 'things' - designs that we find in the city, in our homes and offices, on page and screen, and in our everyday lives. In her introduction, Grace Lees-Maffei explores the idea of iconicity and what makes a design 'iconic', and fifty essays by leading design and cultural critics address the development of each iconic 'thing', its innovative and unique qualities, and its journey to classic status. Subjects range from the late 19th century to the present day, and include the Sydney Opera House, the Post-It Note, Coco Chanel's classic suit, the Sony Walkman™, Hello Kitty™, Helvetica, the Ford Model T, Harry Beck's diagrammatic map of the London Underground and the Apple iMac G3. This handsome volume provides a treasure trove of 'stories' that will shed new light on the iconic designs that we use without thinking, aspire to possess, love or hate (or love to hate) and which form part of the fabric of our everyday lives.

The Business of Sharing May 06 2020 Providing a colorful insight into the people at the forefront of the emergent Sharing Economy, a movement predicted to already be worth around \$26B a year, this book gives vital advice to anyone thinking of starting or investing in a collaborative consumption business. The first of its kind, written by an author on the forefront of this new trend.

HCI International 2021 - Posters Dec 13 2020 The three-volume set CCIS 1419, CCIS 1420, and CCIS 1421 contains the extended abstracts of the posters presented during the 23rd International Conference on Human-Computer Interaction, HCII 2021, which was held virtually in July 2021. HCII 2021 received a total of 6326 submissions, of which 1439 papers and 238

posters were accepted for publication in the pre-conference proceedings after a careful reviewing process. The 238 poster papers presented in these three volumes are organized in topical sections as follows: Part I: HCI theory and methods; perceptual, cognitive and psychophysiological aspects of interaction; designing for children; designing for older people; design case studies; dimensions of user experience; information, language, culture and media. Part II: interaction methods and techniques; eye-tracking and facial expressions recognition; human-robot interaction; virtual, augmented and mixed reality; sand privacy issues in HCI; AI and machine learning in HCI. Part III: interacting and learning; interacting and playing; interacting and driving; digital wellbeing, eHealth and mHealth; interacting and shopping; HCI, safety and sustainability; HCI in the time of pandemic.

Human Interface and the Management of Information: Applications and Services Jun 30 2022 The two-volume set LNCS 9734 and 9735 constitutes the refereed proceedings of the Human Interface and the Management of Information thematic track, held as part of the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, Canada, in July 2016. HCII 2016 received a total of 4354 submissions of which 1287 papers were accepted for publication after a careful reviewing process. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas This volume contains papers addressing the following major topics: communication, collaboration and decision-making support, information in e-learning and e-education, access to cultural heritage, creativity and art, e-science and e-research, information in health and well-being.

WALNECK'S CLASSIC CYCLE TRADER, FEBRUARY 2002 Feb 01 2020

Interdisciplinary Approaches to Climate Change for Sustainable Growth Jun 06 2020 The book is an edited collection of contributions by a

distinguished international panel of academics on the main scientific, juridical, and economic aspects involved in the mitigation and adaptation processes imposed by climate change. Explicitly interdisciplinary, the book transversally cuts through different disciplines offering an outline of a phenomenon that is too often left to specific and sectorial insights. The volume is divided into four parts. The first part introduces the main concepts of the book: climate change and sustainability, wellbeing, and mitigation and adaptation. The second part presents the scientific understanding of climate change and explores some of the more pressing issues driving policy development, such as the melting of the glaciers and the impact on coastal areas. The third part discusses significant experiences in the environmental policies both in the European Union and in the United States of America. The last section explains possible approaches to climate change, by exploring the legal and economic aspects of both adversarial and more lenient approaches towards a more sustainable world. It faces four main issues in the economic and juridical context: consumer behaviors, climate litigations, environmental litigations and the alternative forms of dispute resolution on environmental matters, with particular regard to environmental mediation. Offering a new vision of sustainable policies, this volume will be of interest to researchers and students of environmental policy, resource economics, environmental law, sustainable development, and public administration, as well as practitioners and policy makers working in related areas.

Energy Efficiency: Innovations: Driving Prosperity, Slashing Emissions

Jan 14 2021

Energy efficiency touches all parts of the economy and lies at the heart of all plausible strategies for addressing climate change. A fascinating range of new technologies and new business models have emerged in the past few years and are rapidly reshaping the field and driving efficiency improvements — many of them completely unexpected. This book provides a fresh look at energy efficiency written in a way that can be interesting to experts and serve as an entry point for novices. With chapters written by recognized experts in their fields of expertise, the book provides readers with a clear

perspective on the state-of-the art developments of both new technologies and new approaches to system design and operations in buildings, industry, transportation, and urban design. Strategies for electrification and optimization based on data and powerful algorithms are also explored in depth. The discussion includes new mobility systems, smart buildings, reimagined industrial processes, new materials, and smart grid integration.

Official Gazette of the United States Patent and Trademark Office Jul 08 2020

The Miles Souris Report Feb 24 2022 While society and social security have established the age proper for retirement, many seniors just aren't ready to pack it in then. They leave their jobs but want to remain independent of their families and continue a lifestyle that accommodates their individual sense of living. This, most often, cannot be accomplished by moving in with the kids. The idea of likeminded people sharing a roof spawned the independent living communities to which today's seniors are flocking. No more mowing the lawn, property taxes, window washing, cooking every meal—true retirement is accomplished by moving to a senior living community. Yes, this should be the ideal scenario. But it isn't always utopia. The elder generation wants to retain its independence and its dignity. Life in a retirement community does not guarantee either. The stories and incidents in this book have been gathered from former and current residents of senior living communities, their families, and past and present employees of several different senior communities. The retirement facility in this book is fictional. But similarities to actual communities are almost impossible to avoid as they are basically so much alike.

WALNECK'S CLASSIC CYCLE TRADER, JANUARY 2002 Nov 11 2020

Kinship and Urbanization Apr 04 2020 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was

originally published in 1972.

Advances in Ergonomics Modeling, Usability & Special Populations May 30 2022 This book focuses on emerging issues in ergonomics, with a special emphasis on modeling, usability engineering, human computer interaction and innovative design concepts. It presents advanced theories in human factors, cutting-edge applications aimed at understanding and improving human interaction with products and systems, and discusses important usability issues. The book covers a wealth of topics, including devices and user interfaces, virtual reality and digital environments, user and product evaluation, and limits and capabilities of special populations, particularly the elderly population. It presents both new research methods and user-centered evaluation approaches. Based on the AHFE 2016 International Conference on Ergonomics Modeling, Usability and Special Populations, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, the book addresses professionals, researchers, and students dealing with visual and haptic interfaces, user-centered design, and design for special populations, particularly the elderly.

WALNECK'S CLASSIC CYCLE TRADER, JUNE 2002 Jul 28 2019

Smart Design Oct 11 2020 Good product designs merge materials, technology and hardware into a unified user experience; one where the technology recedes into the background and people benefit from the capabilities and experiences available. By focusing on functional gain, critical awareness and emotive connection, even the most multifaceted and complex technology can be made to feel straightforward and become an integral part of daily life. Researchers, designers and developers must understand how to progress or appropriate the right technical and human knowledge to inform their innovations. The 1st International Smart Design conference provides a timely forum and brings together researchers and practitioners to discuss issues, identify challenges and future directions, and share their R&D findings and experiences in the areas of design, materials and technology. This proceedings of the 1st Smart Design conference held at Nottingham Trent University in

November 2011 includes summaries of the talks given on topics ranging from intelligent textiles design to pharmaceutical packaging to the impact of social and emotional factors on design choices with the aim of informing and inspiring future application and development of smart design.

Titanium Ebay, 2nd Edition Jul 20 2021 How to make it to the online big time! Titanium eBay® is for everyone who aspires to reach the highest level of success within eBay®, whether they've been selling for years or whether they're just starting out but have ambitious plans for their business. With 60 chapters that leave no stone unturned, this is truly the business bible for eBay® PowerSellers. ? eBay® ended 2007 with over \$8.7 billion in gross merchandise sales ? There are 212 million global registered eBay® users operating across 23 international eBay® sites, twice as many as in 2004 ? There are approximately 720,000 PowerSellers on eBay® who make a living selling merchandise through eBay®.

HCI International 2016 - Posters' Extended Abstracts Jun 18 2021 This is the second volume of the two-volume set (CCIS 617 and CCIS 618) that contains extended abstracts of the posters presented during the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, Canada, in July 2016. The total of 1287 papers and 186 posters presented at the HCII 2016 conferences was carefully reviewed and selected from 4354 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers included in this volume are organized in the following topical sections: web, social media and communities; gesture and motion-based interaction; expressions and emotions recognition and psychophysiological monitoring; technologies for learning and creativity; health applications; location-based and navigation applications; smart environments and the Internet of Things; design and evaluation case studies.

[Handbook on Electric Vehicles Manufacturing](#)

(E- Car, Electric Bicycle, E- Scooter, E-Motorcycle, Electric Rickshaw, E- Bus, Electric Truck with Assembly Process, Machinery Equipments & Layout) Nov 04 2022 Handbook on Electric Vehicles Manufacturing (E- Car, Electric Bicycle, E- Scooter, E-Motorcycle, Electric Rickshaw, E- Bus, Electric Truck with Assembly Process, Machinery Equipments & Layout) An electric vehicle (EV) is one that is powered by an electric motor rather than an internal-combustion engine that burns a mixture of gasoline and gases to generate power. As a result, such a vehicle is being considered as a potential replacement for current-generation automobiles in order to solve issues such as:- a) Growing Pollution b) Global Warming, c) Natural Resource Depletion, and so on. Despite the fact that the concept of electric vehicles has been around for a long time, it has garnered a lot of attention in the last decade as a result of the rising carbon footprint and other environmental implications of gasoline-powered vehicles. The global electric vehicle market is expected to increase at a CAGR of 21.7 percent. Increased government investments in the development of electric vehicle charging stations and hydrogen fuelling stations, as well as buyer incentives, will provide chances for OEMs to increase their revenue stream and regional footprint. The EV market in Asia Pacific is expected to develop steadily due to increasing demand for low-cost, low-emission vehicles, whereas the market in North America and Europe is expected to rise quickly due to government initiatives and the growing high-performance passenger vehicle segment. India's flagship plan for boosting electric mobility is FAME, or Faster Adoption and Manufacturing of (Hybrid and) Electric Vehicles FAME Scheme has been authorized by the government, with 86 percent of overall budgetary support has been set aside for the Demand Incentive, which aims to increase demand for EVs throughout the country. This phase will support e-buses, e-3 wheelers, e-4 wheeler passenger cars and e-2 wheelers in order to build demand. The book covers a wide range of information related to the manufacture of electric vehicles. It includes E- Car, Electric Bicycle, E- Scooter, E-Motorcycle, Electric Rickshaw, E- Bus, Electric Truck with Assembly Process, contact information for machinery

suppliers, Directory Section & Factory Layout. A detailed guide on the manufacturing and entrepreneurship of electric vehicles. This book serves as a one-stop shop for everything you need to know about the Electric Vehicle Manufacturing industry, which is rife with opportunities for startups, manufacturers, merchants, and entrepreneurs. This is the only book on the production of commercial electric vehicles. It's a veritable feast of how-to information, from concept through equipment acquisition.

Electric Cars Oct 30 2019 A simple, straightforward guide to buying your first electric car. Why go electric now when other fuels are still widely available? What are the pros and cons? How do I charge it? What public or private charge point options are there? Are electric cars really greener than petrol/diesel cars? How do electric cars work? All this and more is explained with a minimum of jargon and tech speak. With a look at electric motorcycles, classic cars, records and racers, this handy guide is a must-read for anyone interested in the future of personal transport.

Energy Transition in the Baltic Sea Region Jan 26 2022 This book analyses the potential for active stakeholder engagement in the energy transition in the Baltic Sea Region (BSR) in order to foster clean energy deployment. Public acceptability and bottom-up activities can be critical for enduring outcomes to an energy transition. As a result, it is vital to understand how to unlock the potential for public, community and prosumer participation to facilitate renewable energy deployment and a clean energy transition - and, consequently, to examine the factors influencing social acceptability. Focussing on the diverse BSR, this book draws on expert contributions to consider a range of different topics, including the challenges of social acceptance and its policy implications; strategies to address challenges of acceptability among stakeholders; and community engagement in clean energy production. Overall, the authors examine the practical implications of current policy measures and provide recommendations on how lessons learnt from this 'energy lab region' may be applied to other regions. Reflecting an interdisciplinary approach in the social sciences,

this book is an essential resource for scholars, students and policymakers researching and working in the areas of renewable energy, energy policy and citizen engagement, and interested in understanding the potential for bottom-up, grassroots activities and social acceptability to expedite the energy transition and reanimate democracies.

Chinese Characters Feb 12 2021 Any non-Asian who has tried to study Chinese characters can tell you that a tiny line or dot makes a difference to the meaning. The same is true in life. Every event makes a difference, even if that difference is too small to appreciate at the time. This story reflects one couple's attempt to observe and comment on China and Chinese culture, one event at a time, as they spent a "gap year" not between high school and university but between work and retirement by living and working in Kunming.

Occupational Outlook Quarterly Aug 28 2019

The Timecharger Mar 28 2022 In the 2060's, a scientist at a French laboratory, named Cédric Rothschild, discovers how to fabricate miniature black holes by assembling neutrons into clusters. These supermassive objects have the property of modifying the speed of light in nuclear reactions, enabling a new type of ship propulsion called microfusion reactors. The discovery transforms maritime technology, and ushers in a new era in global commerce and travel--most notably, by cruise ships. An unanticipated consequence of the technology surfaces, however, when it is discovered that neutrons assembled in certain ways also had the property of modifying time locally by a process called timecharging, with the potential to destabilize the global balance of power in a way not experienced since the nuclear arms race. An unlikely heroine with a long naval pedigree named Sandi Brundt--a junior officer recently graduated from the Maritime Academy in Copenhagen--is called into action during an attempted hijacking of her cruise ship on the high seas by a band of pirates working for a notorious extra-national group called The Syndicate, intent on stealing the timecharger device and gaining world domination by deploying it for evil purposes. The ensuing high adventure propels Sandi to become a 'dragon-slayer' in a global conflict between good and evil in the post-modern age when

empires no longer controlled the world.

Automotive Engineering International Sep 29 2019

Fuel Cell Seminar 2010 Sep 09 2020 The papers included in this issue of ECS

Transactions were originally presented at the 2010 Fuel Cell Seminar & Exposition, held in San Antonio, Texas, October 18-21, 2010.

Modern Trends and Research in Intermodal Transportation Jan 02 2020 This book presents a specific technical solution, called intermodal transport, which became the basic technological solution that made it possible to provide global interregional transport. Every day, new technical, technological, and organizational solutions appear that significantly affect the further development of this industry. However, there are certain local differences between regions. In addition, an essential factor is the exchange of experience between scientists from different countries. Accordingly, the purpose of this monothematic book is to acquaint readers with the achievements of scientists dealing with this topic and living in different regions.

Scientists and specialists from Poland, Germany, Great Britain, USA, Romania, Bulgaria, Russia, Italy, Kazakhstan, and Lithuania participated in the writing of individual chapters of this book. This book is intended for professionals, teachers, students, and others who are interested in new approaches to solving transport problems.

Circular Economy Aug 21 2021 This book is aimed at companies, researchers, consultants, consumers, students and any interested public interested in the subject, the reflections and practices of the circular economy. As part of the draft law on the circular economy in France, the authors (researchers and experts) analyze the data and the reflections and base their arguments on real examples in order to propose solutions and recommendations for a green economy. It gives an updated overview of the

reflections and practices around the circular economy. The book is divided into three parts: - The company and its functions, innovative business models - The institutional, legislative and normative framework - Some sectors of activity with the prism of the circular economy
Innovation for Entrepreneurs Jun 26 2019

Innovation for Entrepreneurs presents a powerful but easy to apply toolkit for innovation, based on Professors Meyer and Lee's decades of experience as company founders and innovators for corporations around the globe. This textbook includes guidance in developing new product and service ideas with genuine impact, building teams around these ideas, understanding customers' needs, translating these needs into compelling product and service designs, and creating initial prototypes. It also helps students learn how to scope and size target markets and position an innovation successfully relative to competitors. These methods are fundamental for any new, impactful venture.

Surveillance State May 18 2021 Where is the line between digital utopia and digital police state? Surveillance State tells the gripping,

startling, and detailed story of how China's Communist Party is building a new kind of political control: shaping the will of the people through the sophisticated—and often brutal—harnessing of data. It is a story born in Silicon Valley and America's "War on Terror," and now playing out in alarming ways on China's remote Central Asian frontier. As a minority separatist movement strains against Party control, China's leaders have built a dystopian police state that keeps millions under the constant gaze of security forces armed with AI. But across the country in the city of Hangzhou, the government is weaving a digital utopia, where technology helps optimize everything from traffic patterns to food safety to emergency response. Award-winning journalists Josh Chin and Liza Lin take readers on a journey through the new world China is building within its borders, and beyond. Telling harrowing stories of the people and families affected by the Party's ambitions, Surveillance State reveals a future that is already underway—a new society engineered around the power of digital surveillance.
