Resisting McDonaldization Jul 21 2021 George Ritzer's McDonaldization thesis argued that contemporary life is succumbing to the standardization, flexibility and practicability of fast-food service. This book brings together specially commissioned papers by leading social and cultural analysts to engage in a critical appraisal of the thesis. The contributors discuss the roots of the thesis, the rationalization of late modern life, the effects of increasing cultural commodification, the

continuing prominence of American cultural and economic imperialism and the impact of globalization on social and cultural life. The strengths and weaknesses of the McDonaldization thesis are clearly evaluated and the irrational consequences of rationalization are pinpointed and critically

Nature and Ideology Jul 29 2019 The essays in this volume explore the broad range of ideas about nature reflected in twentieth-century concepts of natural gardens and their ideological implications. They also investigate garden

designers' use of earlier ideas of natural gardens and their relationship to the rich model that nature offers.

Messy Play in the Early Years Jan 03 2020 Combining a rich theoretical foundation with practical tips, advice and case studies, *Messy Play in the Early Years* provides an informative and practical exploration of the unique qualities, characteristics and learning possibilities of messy play. Packed with valuable insights from research and theory, along with practitioner's experiences, this accessible book will bolster readers' understanding and appreciation of messy play and demonstrate how a range of

material engagements can enhance young children's development and learning. Exploring an array of resources and a broad spectrum of approaches, including adult- and child-led inquiry, chapters consider how the specific sensory qualities of materials encourage problem-solving, scientific thinking, creativity, self-regulation and self-expression as children discover and make sense of new phenomena. With examples of international practice and reflective questions throughout, the book highlights a variety of approaches to meeting differing time, space and budgetary needs, simplifies preparation and planning, and

empowers practitioners and children to understand and use messy play effectively. An essential guidebook to supporting an engaging and rewarding journey into messy play, *Messy Play in the Early Years* will be an invaluable resource for early years students, practitioners and parents looking to understand and enhance children's learning possibilities.

Structuralism and

Structures May 19 2021 This book is devoted to an analysis of the way that structures must enter into a serious study of any subject, and the term ?structuralism? refers to the general method of approaching a subject from the viewpoint of structure. A proper appreciation of this approach requires a deeper understanding of the concept of structure than is provided by

the simple intuitive notion of structures that everyone possesses to some degree. Therefore, a large part of the discussion is devoted directly or indirectly to a study of the nature of structures themselves. A formal definition of a structure, plus some basic general properties and examples, is given early in the discussion. Also, in order to clarify the general notions and to see how they are used, the later chapters are devoted to an examination of how structures enter into some special fields, including linguistics, mental phenomena, mathematics (and its applications), and biology (especially in the theory of

evolution). Because the author is a mathematician, certain mathematical ideas have influenced greatly the choice and approach to the material covered. In general, however, the mathematical influence is not on a technical level and is often only implicit. Even the chapter on mathematical structures is nontechnical and is about rather than on mathematics. Only in the last chapter and earlier in three short sections does one find any of the expected ?formal? mathematics. In other words, the great bulk of the material is accessible to someone without a mathematical background. Gifts of Oneself Aug 02 2022 James Harold "Jim" Hamby was

a football coach at Southeast Missouri State University and a brilliant, very popular professor of philosophy at Southeast from 1968 until his death in 1986 at the age of fifty-five. He studied birds, taught himself the art of watercolors, and gave more than 300 of his beautiful and detailed creations to other faculty and friends. Hamby would paint the picture first, then write an essay to accompany it. The relationship between his artwork and writing shifted as the occasion or his inclination suggested. Some of his entries are about the bird he painted and its sighting; other entries are philosophical musings about life, friends and family, nature,

or the arts. Gifts of Oneself: Art and Writings by James H. Hamby represents a lasting word and image celebration of a talented man, well loved by his family, friends, and community.

The Utopian Vision of H.G.

Wells Mar 29 2022 This book examines and develops the evolutionary utopian ideas of H.G. Wells. It begins with a detailed consideration of the types of individuals who could create and live in ideal societies, as well as the social, aesthetic and intellectual aspects of utopian life in Wells's books. It then discusses the role of the state and how Wells's utopian thought requires a permanent

commitment to expanding freedom. The final chapter covers death and how utopian thought can profoundly reshape the reader's understanding of his or her own position relative to current and future societies.

Discussing Disney Aug 10 2020 These scholarly essays examine Disney's cultural impact from various perspectives—including film studies, history, musicology, gender and more. The academic field of Disney Studies has evolved greatly over the years, as the twelve

essays collected in this volume demonstrate. With a diversity of perspectives and concerns, the contributors examine the cultural significance and impact of the Disney Company's various outputs, such as animated shorts and films, theme park attractions, television shows, books, music, and merchandising. By looking at Disney from some of its many angles—including the history and the persona of its founder, a selection of its successful and not-so-successful films, its approaches to animation, its branding and fandom, and its reception and reinterpreted within popular culture—*Discussing Disney* offers a more holistic

understanding of a company that has been, and continues to be, one of the most important forces in contemporary culture. *Interpreting Objects and Collections* Jun 27 2019 This volume brings together for the first time the most significant papers on the interpretation of objects and collections and examines how people relate to material culture and why they collect things. The first section of the book discusses the interpretation of objects, setting the philosophical and historical context of object interpretation. Papers are included which discuss objects variously as historical documents, functioning material, and as semiotic texts,

as well as those which examine the politics of objects and the methodology of object study. The second section, on the interpretation of collections, looks at the study of collections in their historical and conceptual context. Many topics are covered such as the study of collecting to structure individual identity, its affect on time and space and the construction of gender. There are also papers discussing collection and ideology, collection and social action and the methodology of collection study. This unique anthology of articles and extracts will be of inestimable value to all students and professionals involved in the interpretation of

objects and collections. *Report of the Deputy Keeper of the Public Records* Feb 25 2022
Doing Visual Research with Children and Young People Aug 22 2021
Visual media offer powerful communication opportunities. *Doing Visual Research with Children and Young People* explores the methodological, ethical, representational and theoretical issues surrounding image-based research with children and young people. It provides well-argued and illustrated resources to guide novice and experienced researchers through the challenges and benefits of visual research. Because new

digital technologies have made it easier and cheaper to work with visual media, Pat Thomson brings together an international body of leading researchers who use a range of media to produce research data and communicate findings. Situating their discussions of visual research approaches within the context of actual research projects in communities and schools, and discussing a range of media from drawings, painting, collage and montages to film, video, photographs and new media, the book offers practical pointers for conducting research. These include why visual research is used how to involve children and young

people as co-researchers complexities in analysis of images and the ethics of working visually institutional difficulties that can arise when working with a 'visual voice' how to manage resources in research projects Doing Visual Research with Children and Young People will be an ideal guide for researchers both at undergraduate and postgraduate level across disciplines, including education, youth and social work, health and nursing, criminology and community studies. It will also act as an up-to-date resource on this rapidly changing approach for practitioners working in the field. Pat Thomson is Professor

of Education and Director of Research in the School of Education, University of Nottingham, UK. She is a former school principal of disadvantaged schools in Australia.

The Ethnomusicology of Western Art Music Oct 12 2020 Since the late 1980s, the boundaries between the 'musicologies' have become increasingly blurred. Most notably, a growing number of musicologists have become interested in the ideas and methodologies of ethnomusicology, and in particular, in applying one of the central methodological tools of ethnomusicology - ethnography - to the study of

Western 'art' music, a tradition which had previously been studied primarily through scores, recordings and other historical sources. Alongside this, since the 1970s a small number of ethnomusicologists have also written about Western art music, thus complicating the idea of ethnomusicology as the study of 'other' music. Indeed, there has been a growth in this area of scholarship in recent years. Approaching western art music through the perspectives of ethnomusicology can offer new and enriching insights to the study of this musical tradition, as shown in the writings presented in this book. The current volume is the first

collection of essays on this topic and includes work by authors from a range of musicological and ethnomusicological backgrounds, exploring a variety of issues including music in orchestral outreach programmes, new audiences for classical music concerts, music and conflict transformation, ethnographic study of the rehearsal process, and the politics of a high-profile music festival. This book was originally published as a special issue of *Ethnomusicology Forum*. [Designers' Shakespeare](#) Jan 15 2021 Theatre Design involves everything seen on stage: not only scenery but costumes,

wigs, makeup, properties, lighting, sound, even the shape and material of the stage itself. *Designers' Shakespeare* presents and analyses the work of a half-dozen leading practitioners of this specialist art. By focusing specifically on their Shakespearean work, it also offers a fresh, exciting perspective on some of the best-known drama of all time. Shakespeare's plays offer an unusual range of opportunities to designers. As they were written for a theatre which gave no opportunity for scenic support or embellishment, designers are freed from any compulsion to imitate original practices. This has resulted in the extraordinarily diverse

range of works presented in this volume, which considers among others the work of Josef Svoboda, Karl-Ernst Herrmann, Ming Cho Lee, Alison Chitty, Robert Wilson, Societas Raffaello Sanzio, Filter Theatre, Catherine Zuber, John Bury, Christopher Morley, Ralph Koltai and Sean Kenny. *Designers' Shakespeare* joins *Actors' Shakespeare* and *Directors' Shakespeare* as essential reading for lovers of Shakespeare from theatre-goers and students to directors and theatre designers. **Paul Blaisdell, *Monster Maker*** Jun 19 2021 Paul Blaisdell was the man behind the monsters in such movies as *The She Creature*, *Invasion of*

the Saucer Men, Not of This Earth, It! Terror from Beyond Space and many others. Working in primarily low-budget films, Blaisdell was forced to rely on greasepaint, guts and, most importantly, an unbounded imagination for his creations. From his inauspicious beginning through The Ghost of Dragstrip Hollow (1959), the construction of Blaisdell's monsters and the making of the movies in which they appeared are fully detailed here. Blaisdell's work in the early monster magazines of the 1960s is also covered.

Jackson Stafford and the Pandora Project, 1 & 2 Sep 10 2020 Summary: The Jackson Stafford's Inner-Room

inhabitants, his personalities, will unsuspectingly unravel the secret behind the guise of the Pandora project within the mind of their host. Once again Ben, Carl, Darrell, Denny, Johnny, and Randy will be creating a whole new world and new experiences for their host. La Tulipan will investigate an on-going government program that Jackson has been directly involved with since 1985. Through Astral Projection, he is able to penetrate any firewall within the project's secret vault. A government cover-up is discovered by a civilian who has a direct link to the candidate and exposes the project to the host. An alien

world's projected consciousness is imprisoned deep within the Pandora Project.

Puppets, Masks, and Performing Objects Feb 02 2020 This volume, which originally appeared as a special issue of TDR/The Drama Review, looks at puppets, masks, and other performing objects from a broad range of perspectives. Puppets and masks are central to some of the oldest worldwide forms of art making and performance, as well as some of the newest. In the twentieth century, French symbolists, Russian futurists and constructivists, Prague School semioticians, and avant-garde artists around

the world have all explored the experimental, social, and political value of performing objects. In recent years, puppets, masks, and objects have been the focus of Broadway musicals, postmodernist theory, political spectacle, performance art, and new academic programs, for example, at the California Institute of the Arts. This volume, which originally appeared as a special issue of TDR/The Drama Review, looks at puppets, masks, and other performing objects from a broad range of perspectives. The topics include Stephen Kaplin's new theory of puppet theater based on distance and ratio, a historical overview of

mechanical and electrical performing objects, a Yiddish puppet theater of the 1920s and 1930s, an account of the Bread and Puppet Theater's Domestic Resurrection Circus and a manifesto by its founder, Peter Schumann, and interviews with director Julie Taymor and Peruvian mask-maker Gustavo Boada. The book also includes the first English translation of Pyotr Bogatyrev's influential 1923 essay on Czech and Russian puppet and folk theaters. Contributors John Bell, Pyotr Bogatyrev, Stephen Kaplin, Edward Portnoy, Richard Schechner, Peter Schumann, Salil Singh, Theodora Skipitares, Mark Sussman,

Three Scenarios of Revelation
Nov 24 2021 The book's focus, from which the title is derived, is taken from Revelation 11:18, and opens with "The Wrath of God," continues with "The Judgment of Mankind" and closes with "The Reward of the Saints." A Jewish, Biblical Scholar, Nativ brings a unique, often startling perspective to the Book of Revelation. Basing his theories in Hebraic concepts, not doctrine or dogma, Nativ takes the reader on an exciting, step-by step journey through the Hebrew texts, the original language of the Bible, and through painstaking analysis, breathes new life into the words of the

Old Testament prophets, the apostles, and Jesus. Take for example, the word "Armageddon." Long interpreted as the ultimate battle between good and evil, Nativ uses his extensive Hebrew knowledge to show it is a place, not a battle, and introduces the ancient Hebrew concept of a "place of refuge" as proof. Should Nativ be correct, not only will he change the theology, but dictionary definitions as well. Equally startling is his discussion of Revelation, Chapter Nine, regarding the opening of the bottomless pit and the release of the awesome creatures within. Nativ not only explains what they are, their origins and

their purpose, but, most surprising, the creatures' present location, as they await the ending of the Age. Perhaps most controversial of all is Nativ's answer to the long-asked question regarding the identity of the "Beast" and the meaning of the number "666." Not only will the reader be dumbfounded by the simplicity of Nativ's answer, but horrified by the proximity. Nativ is not dogmatic. He does not expect everyone to agree with his study's conclusions, but instead challenges the reader to prove him biblically incorrect. Neither prophet nor the recipient of a great revelation from God, Nativ's only claim is the wisdom from God to unveil

the meaning of the Book of Revelation in all its complexities.

Text, Theology, and Trowel Sep 30 2019 Text, Theology, and Trowel consists of ten essays on the understanding and reception of the Hebrew Bible in Judaism and Christianity. Textual exegesis, historical contexts, and modern reception of the Hebrew text are placed side by side to encourage interdisciplinary study. Two theologically minded essays are included to help overcome the biblical studies/theology dichotomy. By placing such divergent approaches together, this volume will help expand ways of thinking about the Bible and its cognate fields.

Atlas Obscura Nov 12 2020 It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, *Atlas Obscura* celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to

mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, *ATLAS OBSCURA* revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs,

surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. *ATLAS OBSCURA* is for the explorer.

Madame Li and The Mystery at the Dowager Museum Apr 05 2020 A dead body turns up in the East Asian wing of the fictional Dowager Museum of Art. Madame Li - an intelligent and aristocratic Chinese-American art specialist - gets called in by her former colleague at the museum to examine the art displays around the crime scene. When this dear colleague and friend becomes the prime suspect in the murder investigation,

Madame Li is roped into investigating the crime herself in a race to find the true killer before the authorities can arrest her friend. As she investigates the interconnected suspects with the help of her colorful friends and acquaintances, she unravels buried secrets in New York's exclusive art market that ultimately lead her to the murderer. Madame Li and The Mystery at the Dowager Museum is an upmarket cozy mystery set in contemporary New York. It features classic elements of the cozy genre - a female sleuth, off-stage crime, and eccentric supporting characters - but offers an international and cosmopolitan

twist. If you prefer a quick and amusing read with refreshing characters, then this is the mystery for you.

Understanding Different Geographies Oct 31 2019 This book collects revised versions of papers first delivered at the "Understanding Different Geographies Symposium" held in Puchberg am Schneeberg, Austria in 2011. The Symposium focussed on "Communicating Meaning with [Geo]Graphic Artefacts". visualisations of different geographies - Deconstructing maps of information - and other spaces

The Curators Sep 03 2022

Ever wondered what made the Universe? - Was it the big bang? - Why is it not expanding or contracting? Why does it appear to have an orderly level of functionality? Are there more universes within a much larger multiversal environment? If so, where are they? Are theoretical physicists correct? In *The Curators* the reader is exposed to the mechanics of the multiversal environment we exist within and those entities that maintain it. In *The Curators* you will learn:- · That there is a

hierarchy of entities that maintain the evolutionary efficiency of the multiverse · The roles and responsibilities of these entities · What nature spirits or elementals are · That we exist in many “Event Spaces” and the Realities within them · That there are different classifications of Event Space and Realities · That these entities can change our Event Spaces and/or Realities at will · That evolutionary efficiency is the primary reason for change in the multiverse · That there are different levels of structure to support the maintenance and functionality of the multiverse. *Another Pirate's History of Doctor Who* Mar 17 2021

Welcome to the hidden histories of Doctor Who, the unauthorized, the ignored, the overlooked, the abandoned and the hidden. This second volume chronicles the record of Doctor Who stage plays, official and independent, from *Curse of the Daleks* to the *Trials of Davros*, including the reviews of the recordings and documentaries about these plays. We explore the bizarre copyright and legal structure underlying Doctor Who, that led the BBC to discard two hundred classic episodes to the junk pile in the 70s. And that same copyright structure allowed fans to legally make their own movies in the Doctor Who universe in the 90s using everything but

the Doctor himself. And we'll look at many of these productions, from Colin Baker's 'The Stranger' series, to Downtime with the Brigadier, Sarah Jane, Victoria Waterfield (with the original actors playing their original roles), as well as the Great Intelligence and the Yeti, to excursions with Sontarans and Rutans, Autons, Daemons and more. And we'll see how, despite the BBC's efforts, the fans managed to save every lost episode on Audio, were essential to the recover of over a hundred lost episodes on video, and the efforts to remake, reconstruct, and re-make lost adventures, including ones the BBC never actually filmed. Chock full of

reviews and articles, the Pirate Histories pull back the curtains and show you the places and things in the world of Doctor Who that you never imagined. *Viral* May 07 2020 Stories are repeated. They evolve. They are cross-bred and spliced. Ideas take on a life of their own. The oldest legends appear in the latest retellings. One day, by design or accident, it had to happen... You shouldn't read this. Don't say I didn't warn you. A new short story from the author of Sellenria: The Starship and the Citadel **Rembrandt: Detailed Paintings** May 31 2022 Rembrandt Harmenszoon van Rijn is usually considered one of the greatest painters in

European art history and the most important in Dutch history. Rembrandt's greatest creative triumphs are exemplified especially in his portraits of his contemporaries, self-portraits and illustrations of scenes from the Bible. His self-portraits form a unique and intimate biography, in which the artist surveyed himself without vanity and with the utmost sincerity. Among the more prominent characteristics of Rembrandt's work are his use of chiaroscuro, the theatrical employment of light and shadow derived from Caravaggio, or, more likely, from the Dutch Caravaggisti, but adapted for very personal means. Also notable are his

dramatic and lively presentation of subjects, devoid of the rigid formality that his contemporaries often displayed, and a deeply felt compassion for mankind, irrespective of wealth and age. In his paintings he exhibited knowledge of classical iconography, which he molded to fit the requirements of his own experience; thus, the depiction of a biblical scene was informed by Rembrandt's knowledge of the specific text, his assimilation of classical composition, and his observations of Amsterdam's Jewish population. Because of his empathy for the human condition, he has been called "one of the great prophets of

civilization." This book aims to help you see the same way as Rembrandt has seen. Rembrandt's secrets are not in his words, they are in his works. Look at his paintings in details, the lines, the light, the shadows, the composition, the contrasts, the details. His paintings tell us what we cannot see but need to know and that should be enough. The goal of this book is to make the art of Rembrandt more accessible to everyone. There are so many theories about the Rembrandt's techniques but the book will show you how to get close to his art in number of ways.
